IN SEPTEMBER 2018, THE KOREAN SECURITIES AND FUTURES COMMISSION ("SFC") DETERMINED TO IMPOSE ON DALTON INVESTMENTS LLC ("DALTON") AN "ADMINISTRATIVE FINE" OF 7,500,000 KRW (APPROXIMATELY $6,700 USD), WHICH DALTON PAID IN DUE COURSE. THE SFC ALLEGED THAT DALTON, ON BEHALF OF ONE OF THE FUNDS UNDER DALTON'S MANAGEMENT, PLACED AN ORDER IN JULY 2017 TO ENGAGE IN A SHORT SALE IN KOREA WITHOUT BORROWING THE SECURITIES TO BE SOLD, VIOLATING THE SHORT SALE RESTRICTION PROVISIONS IN THE FINANCIAL INVESTMENT SERVICES AND CAPITAL MARKETS ACT OF KOREA. THIS MATTER ARISES OUT OF THE FOLLOWING: DALTON, ON BEHALF OF ONE OF ITS FUNDS, REQUESTED ITS PRIME BROKER TO LOCATE AND MAKE AVAILABLE SHARES OF A SECURITY WITH AN INTENT TO SELL THE SHARES SHORT. AFTER DALTON'S PRIME BROKER APPROVED THE REQUEST, DALTON PLACED A SHORT SALE TRADE. THEREAFTER, THE EXECUTING BROKER IN KOREA NOTIFIED DALTON THAT THE TRADE WAS FAILING BECAUSE THE SHARES HAD NOT BEEN PLACED IN DALTONFUND'S INVESTOR REGISTRATION CODE ("IRC") ACCOUNT BUT RATHER WERE IN THE PRIME BROKER'S SWAP IRC ACCOUNT. TO RESOLVE THIS PROBLEM, THE TRADE WAS SETTLED ON TIME AFTER THE EXECUTING BROKER DELIVERED THE SHARES FROM ITSINVENTORY. UPON LEARNING OF THIS ISSUE, DALTON IMMEDIATELY PURCHASED THE SHARES IN THE OPEN MARKET AND RETURNED THE SHARES TO THE EXECUTING BROKER.

If the remaining amount is at least $10 billion in regulatory assets under management, complete Question (a). Do not report those investments based on related or underlying portfolio assets. Cash equivalents include bank deposits, certificates of deposit, bankers' acceptances and similar bank instruments.

Some assets could be classified into more than one category or require discretion about which category applies. You may use your own internal methodologies and the conventions of your service providers in determining how to categorize assets, so long as the methodologies or conventions are consistently applied and consistent with information you report internally and to current and prospective clients. However, you should not double count assets, and your responses must be consistent with any instructions or other guidance relating to this Section.

Note that if you are filing an umbrella registration, you should not check Item 7.A.(2) with respect to your relying advisers, and you do not have to complete Section 7.A. in Schedule D for your relying advisers. You should complete a Schedule R for each relying adviser.

For each related person, including foreign affiliates that may not be registered or required to be registered in the United States, complete Section 7.A. of Schedule D.

You do not need to complete Section 7.A. of Schedule D for any related person if: (1) you have no business dealings with the related person in connection with advisory services you provide to your clients; (2) you do not conduct shared operations with the related person; (3) you do not refer clients or business to the related person, and the related person does not refer prospective clients or business to you; (4) you do not share supervised persons or premises with the related person; and (5) you have no reason to believe that your relationship with the related person otherwise creates a conflict of interest with your clients.

You must complete Section 7.A. of Schedule D for each related person acting as qualified custodian in connection with advisory services you provide to your clients (other than any mutual fund transfer agent pursuant to rule 206(4)-2(b)(1)), regardless of whether you have determined the related person to be operationally independent under rule 206(4)-2 of the Advisers Act.

SECTION 7.A. Financial Industry Affiliations

IN SEPTEMBER 2018, THE KOREAN SECURITIES AND FUTURES COMMISSION ("SFC") DETERMINED TO IMPOSE ON DALTON INVESTMENTS LLC ("DALTON") AN "ADMINISTRATIVE FINE" OF 7,500,000 KRW (APPROXIMATELY $6,700 USD), WHICH DALTON PAID IN DUE COURSE. THE SFC ALLEGED THAT DALTON, ON BEHALF OF ONE OF THE FUNDS UNDER DALTON'S MANAGEMENT, PLACED AN ORDER IN JULY 2017 TO ENGAGE IN A SHORT SALE IN KOREA WITHOUT BORROWING THE SECURITIES TO BE SOLD, VIOLATING THE SHORT SALE RESTRICTION PROVISIONS IN THE FINANCIAL INVESTMENT SERVICES AND CAPITAL MARKETS ACT OF KOREA. THIS MATTER ARISES OUT OF THE FOLLOWING: DALTON, ON BEHALF OF ONE OF ITS FUNDS, REQUESTED ITS PRIME BROKER TO LOCATE AND MAKE AVAILABLE SHARES OF A SECURITY WITH AN INTENT TO SELL THE SHARES SHORT. AFTER DALTON'S PRIME BROKER APPROVED THE REQUEST, DALTON PLACED A SHORT SALE TRADE. THEREAFTER, THE EXECUTING BROKER IN KOREA NOTIFIED DALTON THAT THE TRADE WAS FAILING BECAUSE THE SHARES HAD NOT BEEN PLACED IN DALTON FUND'S INVESTOR REGISTRATION CODE ("IRC") ACCOUNT BUT RATHER WERE IN THE PRIME BROKER'S SWAP IRC ACCOUNT. TO RESOLVE THIS PROBLEM, THE TRADE WAS SETTLED ON TIME AFTER THE EXECUTING BROKER DELIVERED THE SHARES FROM ITS INVENTORY. UPON LEARNING OF THIS ISSUE, DALTON IMMEDIATELY PURCHASED THE SHARES IN THE OPEN MARKET AND RETURNED THE SHARES TO THE EXECUTING BROKER.

Item 4: Advisory Business

A. Firm Description

We are a disciplined, value-oriented, global investment management firm committed to capital preservation and long-term growth. Since Dalton Investments LLC (a now-dissolved predecessor of Dalton Investments, Inc.) was founded in 1999, our strategies have focused on investments in Asian and Global equity securities, and in 2018, we initiated an Emerging Markets equities strategy. We generally look for less crowded areas of the markets with the objective of generating positive long-term returns on an absolute and relative basis.

We were formed as a Nevada corporation in 2019. Mr. James B. Rosenwald III serves as the Chief Investment Officer, Founding Partner, and the Chairman of the Board of the Directors of Dalton. Gifford Combs, who also was one of the Founding Partners of Dalton Investments LLC (along with Mr. Rosenwald), serves as a Director of Dalton's Board and has portfolio management responsibilities. We also have established a Management Committee to run the firm's day-to-day business, composed of our most senior executives: (i) the Chief Executive Officer/President, (ii) the Chief Operating Officer/Chief Financial Officer, (iii) the Chief Marketing Officer, (iv) the Chief Research Officer and Chief Sustainability Officer and (v) the Chief Compliance Officer and Counsel. As of the date of this document, Rosenwald Capital Management, Inc., for which Mr. Rosenwald serves as the President, is a majority-owner of Dalton, with our remaining shareholders being other senior professionals of Dalton.

B. Advisory Services

We provide discretionary investment advisory services to a select group of domestic and foreign institutional clients including pension plans, charitable organizations, and endowments. The investment parameters of each such separately managed account will vary by strategy, client specific guidelines, and applicable regulations.

In addition, we also provide discretionary investment advisory services to commingled funds. The investors for the funds include domestic and foreign institutional investors, high net-worth family offices, and individuals.

Certain of our commingled funds are structured as "master-feeders" with a domestic feeder, whereby U.S. taxable investors are admitted as limited partners to a Delaware limited partnership and a foreign feeder, whereby U.S. tax exempt entities and foreigners are admitted as shareholders of a Cayman corporation.

The "feeder" funds generally contribute all their assets to a master (Delaware or Cayman Islands) limited partnership which trades and holds investments on behalf of the feeder funds.

In addition to the "master-feeders," Dalton has also established various other structures for its commingled funds, including one that is structured as a Delaware statutory trust.

Commingled funds are offered only by private placement and are limited to accredited and qualified investors as defined by the SEC.

We have included in our ADV Part 1A the list of our private funds managed on a discretionary basis. In addition to the fund disclosures, Part 1A includes information about our affiliated entities that are the general partners to funds. Part 1A is available on the SEC's website or by contacting us.

As of the date of this document, we also serve as a sub-adviser or delegated investment manager to (a) certain UCITS funds formed in the European Union, which are distributed by the applicable investment company (or their affiliates) to qualified investors subject to each country's laws and regulations, and (b) certain pooled investment vehicles formed in Japan, which are distributed by the applicable investment company (or its affiliates) exclusively to investors in Japan subject to Japanese laws and regulations.

C. Customized Services

Our advisory services will vary by client, but we typically have broad and flexible investment parameters and may make investments outside of the core strategies when the opportunity arises and the investment fits our investment philosophy.

For example, certain client accounts and funds may utilize margin borrowing and other forms of leverage. Our client mandates may permit us to invest in long and short positions as well as certain illiquid securities and jurisdictions. Investment parameters and limitations are described in each client's respective advisory contract.

Similarly, the holdings for the pooled investment vehicles which Dalton advises will vary by and within a strategy. The variance is attributable to differing investment strategies, various investment restrictions and tailoring for certain investor limitations or requests.

We may emphasize or deemphasize, add, develop, or eliminate different investments and strategies from time to time depending upon, among other factors, our view of new market opportunities or regulatory changes.

To the extent that our clients are commingled funds, we provide advisory services to the commingled funds and not to the individual investors in such funds.

In addition, we may enter into separate agreements with certain investors in our commingled funds which may provide more favorable terms than those provided to our other investors.

D. Wrap Fee Programs

None.

E. Client Assets

As of December 31, 2025, the regulatory assets under management of Dalton and its affiliates were $5,673,625,666 (based on unaudited numbers).

Item 5: Fees and Compensation

A. Advisory Fees and Compensation

Management Fees

Our compensation generally includes a management fee typically paid in arrears either monthly or quarterly. Fees for strategy-specific separately managed accounts are subject to negotiation. Factors such as the client's proposed investment size and/or a long-term commitment may be taken into consideration in negotiating the fees.

Management fees payable by the commingled funds may vary and are described in each fund's offering materials, or organizational documents. Dalton's standard management fees charged to the funds are calculated as a percentage of assets under management and typically range from 0.5% up to 1.5% per annum but may be lower per client written agreements. Management fees are generally payable and deducted from the assets of each fund monthly in arrears.

Performance Fees and Allocations

For certain client accounts and commingled funds, including the UCITS funds, we receive performance-based compensation. For our funds, our standard performance-based allocation is typically charged at a year-end generally, at a rate of 20% of all net realized and unrealized profits (if any) from each investor's account as of year-end, which is then reallocated to the respective fund's general partner or special member (as applicable) account. Certain funds have a performance-based compensation based on relative performance over a specific benchmark, greater than one year performance measurement periods and differing performance compensation rates.

The UCITS funds and the Japanese pooled investment vehicles that we sub-advise or otherwise manage also include performance-based compensation as described in their offering materials. The compensation percentages will vary by and among the different classes within the UCITS and Japanese pooled investment vehicles.

We are generally not entitled to receive any performance-based compensation to the extent that there are unrecouped accumulated losses in performance carried forward from prior years.

We may decide to rebate, reduce, or waive either the management fee or performance-based compensation for certain classes or investors. To the extent that we are sharing portions of either the management fee or performance compensation with others, it is solely at our cost.

To the extent applicable, performance-based compensation are calculated after the accrual of any applicable management fees.

Redemption Amount

We seek to partner with investors who share our long-term view and investment philosophy.

Thus, some of our funds and other collective vehicles may be subject to a fee for withdrawals made during a lock-up period. In those cases, we may charge an early withdrawal fee ranging from 1-20% and deduct directly from the early withdrawal amounts.

Some of our separately managed accounts may also have an early withdrawal provision that provides for a change in fees for early withdrawals.

B. Payment of Fees

We generally charge management fees as of either monthly or quarterly in arrears based upon assets under management for the respective measuring period. The management fee is typically pro-rated for contributions or withdrawals made within, depending on the fund, either intra-month or quarter. Fees paid from commingled funds are debited directly from the funds.

C. Additional Fees and Expenses

Any additional fees and expenses for our separately managed account clients will vary and are subject to negotiation.

Fund investors may pay certain expenses directly or reimburse us for certain expenses paid on a fund's behalf as described in their offering materials. Certain investors have limited the amount of expenses that they pay, pursuant to letter arrangements.

From time to time, certain expenses, such as legal costs, may be allocated across the funds managed by Dalton and the separately managed account clients. In those cases, Dalton generally allocates the expenses on a fair and equitable manner (*e.g.*, *pro rata* based on each fund/account's assets under management).

Generally, funds are responsible for operating expenses which include, but are not limited to the following:

- brokerage and execution charges, commissions, custodial charges, and fees for quotation and other data services;
- fees related to accounting, trading, portfolio management, and risk management systems;
- research subscriptions and expenses, including service contracts related to online research;
- legal and consulting fees related to investment research and due diligence;
- expenses to register securities and transfer taxes;
- costs and expenses incurred for the purpose of protecting or enhancing the value of a fund's assets (including the costs of instituting and defending litigation);
- U.S. federal, state and local taxes, filing and registration fees, including audits associated with such taxes and filings (other than our corporate taxes);

- investor communications, relations, bookkeeping, accounting and the preparation and mailing of financial, tax and performance information to investors fees, costs, and expenses;

- fees, costs, and expenses incurred in connection with borrowings;

- administration fees, costs, and expenses;

- all regulatory and tax compliance fees, costs, and expenses incurred by the fund's general partner, Dalton, or their affiliates in complying with regulatory and tax requirements that directly result from management of such fund (*e.g.*, expenses incurred in complying with FATCA and preparing Form PF), including an allocable share of the general partner's or Dalton's costs, fees and expenses relating to internal regulatory and compliance functions should the fund determine not to use third party providers for such services;

- fees for attorneys, accountants, consultants and other professionals or experts (including the fees and expenses for counsel to Dalton, the general partner, their affiliates or one or more of their respective officers or managers) arising in connection with the fund's business; and

- Directors' fees and expenses for funds organized as corporations.

If one of our funds holds other unaffiliated collective managed investments, *e.g.*, mutual funds, those underlying fund fees, including a management fee, other fund expenses and a possible distribution fee, are paid by the fund directly and are not deducted or rebated from our fees. Please note that you can generally purchase mutual funds directly without Dalton's advisory services.

D. Prepayment of Fees

Not Applicable.

E. Additional Compensation and Conflicts of Interest

While Dalton utilizes third parties to administer the commingled funds, Dalton typically assists in reviewing the net asset value of the commingled funds and retains responsibility to determine the net asset value of its separately managed accounts. This practice creates a potential conflict of interest because, if the determination of the net asset value is inaccurate, Dalton might receive management fees and performance compensation that are greater (or less) than the actual compensation entitled. In addition, for the commingled funds, inaccurate valuations could potentially cause redeeming investors and new investors to receive less (or more) fund redemption proceeds or interests than otherwise entitled. Dalton has instituted valuation policies and procedures, which include monthly internal valuation committee meetings and reconciliation procedures for identifying and resolving material differences with third-party administrators.

Additionally, from time to time, Dalton investment team members serve as directors or special observers on the boards of directors of companies in which we invest, and in such cases, the employee may (although generally do not) receive director fees and/or expenses.

Item 6: Performance-Based Fees and Side-by-Side Management

We manage client accounts with differing fees – including management fee only and relative performance-based compensation accounts.

Consequently, the incentive to favor higher performance-based compensation accounts over accounts with differing fees exists as a potential conflict of interest.

In addition, performance-based compensation may create an incentive for our portfolio managers to select investments that are riskier or more speculative than might otherwise be the case for fixed managed fee accounts.

We seek to mitigate this potential conflict through our allocation policies and procedures. Please see Items 10 and 12 below for a more detailed discussion of conflicts of interest.

Item 7: Types of Clients

Dalton's clients include:

Institutional separate account clients – *e.g.*, pension plans, corporations, charitable entities, and endowments.

Commingled funds, including private funds such as Dalton's master-feeder funds, Delaware statutory trust, and other private commingled funds, and registered funds sub-advised by Dalton.

Investors in the funds may include, among others, pension funds, endowments, foundations, other financial institutions and corporations, fund of funds, family offices, and high net worth individuals. Generally, Dalton requires that each US investor in its private commingled funds be an "accredited investor" as defined in Regulation D under the Securities Act of 1933 and a "qualified purchaser" as defined under the Investment Company Act of 1940. Investors in the funds are generally required to invest a minimum of $1,000,000. Dalton has waived, and reserves the right to modify or waive, this minimum requirement.

Required investment amounts for separately managed accounts are negotiated and may differ substantially.

The private funds may enter into separate agreements, commonly referred to as "side letters," or other similar agreements with a particular limited partner in connection with its admission to the private fund without the approval of any other limited partner, which would have the effect of establishing rights under or supplementing the terms of the applicable private fund's partnership agreement with respect to such limited partner in a manner more favorable to such limited partner than those applicable to other limited partners. Such rights or terms in any such side letter or other similar agreement may include, without limitation: (i) reporting obligations, (ii) waiver of certain confidentiality obligations, (iii) "most favored nation" provisions, (iv) increased liquidity rights, (v) "side pocket" arrangements or (vi) rights or terms requested or necessary considering particular investment, legal, regulatory, or public policy characteristics of a limited partner.

Item 8: Methods of Analysis, Investment Strategies and Risk of Loss

We are a disciplined, value-oriented, global investment management firm committed to capital preservation and long-term growth. Since our formation, our strategies have primarily focused on investments in Asia and Global markets. In 2018, we added an Emerging Markets equities strategy.

We generally seek less crowded areas of markets and believe our value is largely attributable to our agility and rigorous value analysis. Our investment objective is to generate positive long-term compounded returns on an absolute and relative basis.

Across our strategies and client accounts, we seek broad and flexible mandates. We generally concentrate the number of investment holdings. We search for investments that we believe are mispriced or misunderstood in the market and have the potential for appreciation over a longer holding period.

We invest and trade in securities and other instruments, including but not limited to stocks, bonds, notes, high-yield securities, options, warrants, rights, private claims, bank debt, sovereign debt, credit default swaps, derivatives, commodities, futures, options on futures and other securities and instruments of U.S and non-U.S. issuers. Certain accounts may engage in short selling, margin trading and other investment and hedging strategies.

A. Methods of Analysis and Investment Strategies

Asia Strategy and Emerging Markets Strategy

James B. Rosenwald III is Dalton's Chief Investment Officer. Mr. Rosenwald has more than 40 years of investing experience in the region.

He is supported by research teams in Los Angeles, Tokyo, Mumbai, Hong Kong, Sydney, and Seoul, of which some professionals may act as portfolio managers. The research teams run a rigorous screen on prospect companies by applying a fundamental value analysis on each investment. Our Asia mandates are typically Japan only or pan-Asia. Our Emerging Markets mandate began in 2018.

We search for undervalued, typically owner-operated, profitable businesses that we believe are likely to benefit from the substantial growth and structural changes taking place in Asia and emerging markets. Our shorts include specific positions with the opposite characteristics of our long positions or serve as a hedge for the portfolio or a specific security within the portfolio.

Investment ideas are primarily internally generated, and all investments are researched by the portfolio managers and analysts prior to purchase or sale, which is ultimately made by Mr. Rosenwald or other portfolio managers with respect to certain investment vehicles. Our research includes our own determination of fair value through our rigorous analysis of company financials, and requires meetings with key company managers, suppliers, and/or clients to assess company strategy and alignment of interests.

While our investments are primarily in equity securities, certain accounts (including the master-feeder funds, UCITS funds, and other pooled vehicles) permit derivatives, options, debt, and other complicated investments.

Global Strategy

Dalton's Global strategy is managed by Gifford Combs. Mr. Combs has over 40 years' experience as a value investor and has managed equity portfolios for both domestic and international institutions.

His investment philosophy focuses on a smaller number of securities, while continuing to emphasize portfolio selection based on traditional valuation criteria. Mr. Combs seeks to invest in situations that are not generally well-followed or understood by the investment community.

Through detailed research, and patience, Mr. Combs aims to build a concentrated portfolio of high conviction investments and generate above average compounded returns on a long-term basis.

Mr. Combs seeks to adhere to a few investment principles.

- Invest in what he believes to be high-return cash generators
- Search for shareholder friendly management
- Concentrate investments held

PAST PERFORMANCE IS NOT A GUARANTEE OF FUTURE PERFORMANCE. THE VALUE OF THE INVESTMENTS AND THE INCOME FROM THEM CAN GO DOWN AS WELL AS UP AND AN INVESTOR MAY NOT GET BACK THE AMOUNT INVESTED. THESE INVESTMENTS ARE DESIGNED FOR INVESTORS WHO UNDERSTAND AND ARE WILLING TO ACCEPT THESE RISKS. PERFORMANCE MAY BE VOLATILE, AND AN INVESTOR COULD LOSE ALL OR A SUBSTANTIAL PORTION OF ITS INVESTMENT.

B. Certain Risks Relating to Investment Strategies

In considering an investment with us, we urge you to view our strategies as speculative and entailing substantial risks. There is no assurance that we will meet our investment objectives or a certain return threshold. While capital preservation is a primary focus of our investment process, you should consider the impact to you of a substantial or total loss of your investment.

We have included below certain risk factors that we believe are material, significant or unusual for our strategies based on current information. This non-exhaustive list is not a complete explanation of the risks that should be considered prior to investing with us. We do not address certain standard material risk factors that may cover, for example, certain instrument types or structural risks. Some or all of these risks may be applicable to a strategy mandate or fund. Please thoroughly review all materials with your advisers in consideration of your specific circumstances or risk tolerance.

Foreign Investment Considerations

Special risks associated with securities of foreign companies add to the complexity and usual risks inherent in domestic investments. Such special risks include fluctuations in foreign exchange, political or economic instability in the country of issue, and the possible imposition of exchange controls or other laws or restrictions.

In addition, securities prices in foreign markets are generally subject to different economic, financial, political, and social factors than are the prices of securities in U.S. markets. With respect to some foreign countries, there is a possibility of expropriation or confiscatory taxation, limitations on liquidity of securities or political or economic developments.

Moreover, less information may be publicly available concerning certain of the foreign issuers of securities than is available concerning U.S. companies. Foreign companies are also generally not subject to uniform accounting, auditing, and financial reporting standards or to practices and requirements comparable to those applicable to U.S. companies. Trading foreign investments may be particularly difficult depending on the foreign jurisdiction.

Emerging Markets

Emerging market investments are subject to all of the risks of foreign investments generally, as well as additional heightened risks due to a lack of established legal, political, business, and social frameworks to support securities markets.

These risks include, without limitation:

- liquidity risks (sometimes aggravated by rapid and large outflows of “hot money” and capital flight),
- extreme currency and political risks, including potential exchange control regulations and restriction on foreign ownership,
- repatriation of capital,

- social instability and unrest, terrorism, corruption, and crime,

- delays in settling portfolio transactions, risk of loss arising out of systems of security registration and custody, less effective government regulation and supervision of business and industry and a greater likelihood of disruptions brought about by regional conflicts, and

- high levels of inflation, deflation, or currency devaluation, each of which can harm their economies and securities markets.

Given our investment strategy, portfolio holdings may be highly volatile and may decline significantly in response to adverse issuer, political, social, regulatory, market or economic developments.

Foreign Currency Transactions and Exchange Rate Risk

Investments may be denominated in non-U.S. currencies and in other financial instruments, the price of which is determined with reference to such currencies. To the extent unhedged, the value of an account's net assets is subject to fluctuations in exchange rates as well as with price changes of the account's investments in the various local markets and currencies.

Forward currency contracts and options may be utilized to hedge against currency fluctuations, but there can be no assurance that such hedging transactions will be available or, even if undertaken, effective.

Corporate Engagement Strategies

We may pursue a corporate engagement investment strategy, which generally involves acquiring (sometimes substantial) positions in portfolio companies and seeking to influence corporate actions (including those related to the strategy, management, governance, or capital structure of the companies) with the ultimate objective of enhancing long-term shareholder value. This strategy involves substantial uncertainty and may require significant time and expense. The outcome of corporate engagement initiatives may depend on factors beyond our control, including the response of the portfolio company's management and board, support (or the lack thereof) from other shareholders, general market conditions, and the existence of defensive measures or other structural, contractual, or legal constraints that may delay, limit, or prevent the implementation of the desired actions. In addition, if professionals affiliated with Dalton serve as directors or officers of a portfolio company, actual or perceived conflicts of interest may arise between the duties owed to the portfolio company and duties owed to Dalton and Dalton's clients. There can be no assurance that any proposed or implemented changes through this strategy will result in an increase in shareholder value or that any such increase will be realized within any particular timeframe.

Highly Volatile Markets

Price movements of forward contracts and other derivative contracts are influenced by, among other things, interest rates, changing supply and demand relationships, trade, fiscal, monetary and exchange control programs and policies of governments, and national and international political and economic events and policies.

In addition, governments from time to time intervene, directly and by regulation, in certain markets, particularly those in currencies, financial instruments and interest rate-related options. Such intervention often is intended directly to influence prices and may, together with other factors, cause all of such markets to move rapidly in the same direction because of, among other things, interest rate fluctuations.

Concentration of Investments

Client accounts may hold a relatively small number of securities positions, each representing a relatively large portion of the account's capital and may hold a large percentage of capital in cash while awaiting better opportunities. Losses incurred in these positions could have a material adverse on an account's overall financial condition, including opportunity loss.

Small Capitalization Companies

The securities of small capitalization and recently organized companies pose greater investment risks. The equity securities of small capitalization companies may be more illiquid, *i.e.*, less trading volume.

Investments in small capitalization companies may also be more difficult to value than other types of securities. Investments in companies with limited operating histories are more speculative and entail greater risk than do investments in companies with an established operating record. Additionally, transaction costs for these types of investments are often higher than those of larger capitalization companies.

Short Sales

For certain client accounts, we may make short sales in any type of securities. Short sales theoretically involve unlimited loss potential, as the market price of securities sold short may continuously increase.

General Derivatives Considerations

The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in securities or more traditional investments, depending upon the characteristics of the particular derivative and the account's portfolio as a whole.

Derivatives may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in derivatives could have a large potential impact on the account's performance. Derivatives transactions include counterparty risk in addition to the risks associated with the underlying investment.

Distressed Securities

Distressed securities may include the purchase of securities of issuers in bankruptcy, at risk of filing for bankruptcy or may be insolvent. The identification of investment opportunities in distressed securities is a difficult task, and there is no assurance that such opportunities will be successfully recognized or acquired.

While investments in distressed securities offer the opportunities for above average returns, these investments involve a high degree of risk and can result in substantial losses. In addition, the portfolio may be required to hold such securities for a substantial period of time before realizing their anticipated value.

Sustainability Risk

We consider sustainability factors, including environmental, governance and social considerations, in our investment decisions. This consideration may reduce or increase a portfolio's exposure to certain companies or industries, and the portfolio may forego certain investment opportunities as a result. Such portfolio's performance results may be different than other portfolios that do not seek to invest in issuers based on sustainability characteristics or that use different criteria when screening out particular companies and industries. There is also a risk that we may not apply the relevant criteria correctly or that a portfolio could have indirect exposure to issuers that do not meet the relevant sustainability criteria used by such portfolio. Further, there may be limitations with respect to the readiness of data in certain sectors, as well as limited availability of investments with relevant sustainability characteristics in certain sectors. We may change our sustainability assessment of a particular investment over time. While we view sustainability considerations as having the potential to contribute to a portfolio's long-term performance, there is no guarantee that such results will be achieved.

C. Recommendations of Particular Types of Securities

Not Applicable.

Item 9: Disciplinary Information

To the best of our knowledge and as certified annually by each employee, none of our employees have been involved in any legal or disciplinary events in the past 10 years that would be material to a client's evaluation of us.

Item 10: Other Financial Industry Activities and Affiliations

A. Broker-Dealer Registration Status

Not Applicable.

B. Futures Commission Merchant, Commodity Pool Operator or Commodity Trading Advisor Registration Status

We claim exemption from registration with Commodity Futures Trading Commission ("CFTC") and the National Futures Association. Dalton's pooled vehicles also rely on exemptions from registration with the CFTC.

C. Material Relationships or Arrangements with Industry Participants

We provide discretionary investment management services to, and our affiliates serve as the general partner to various commingled funds.

Employees of the Los Angeles, New York, Tokyo, Mumbai, Hong Kong and Sydney and Seoul offices generally do not work for any other third party, except as noted below. In addition, Rosenwald Capital Management, Inc., and Rising Sun Management Ltd. ("Rising Sun") are affiliated entities under common control with us.

Our offices are integrated into Dalton's systems and operations. All are subject to our compliance policies and procedures administered by Dalton's Chief Compliance Officer ("CCO").

Dalton serves as sub-adviser or delegated investment manager to certain funds. Dalton is not aware of any conflicts of interest in relation to these accounts.

D. Certain Conflicts of Interest Among Our Clients

We have adopted policies and procedures, including Code of Ethics and other policies to address certain potential conflicts of interests.

Our affiliated persons and employees from time to time act as directors, secretary, manager, investment manager, or investment adviser or carry out other functions as may be required from time to time in relation to, or be otherwise involved in or with, other funds and clients which have similar investment objectives.

In addition, we do not generally prohibit engagements in existing or future business if such activity does not materially interfere with our business or conflict with our obligations.

Different accounts charge differing fees and incentive fees and/or allocations due to circumstances such as different contractual rates or loss recovery account balances.

Our accounts may have conflicting interests with respect to their investments, including with respect to selling objectives, taxes, performance, liquidity, timing, and other objectives. For example, certain accounts may from time to time be selling securities and instruments that other accounts may continue to hold and/or purchase.

Performance results may vary substantially among our client accounts.

E. Material Conflicts of Interest Relating to Other Investment Advisers

We, along with our affiliates, have relationships with certain advisers and operating companies that could present potential or actual conflicts of interest. Rosenwald Capital Management, Inc. may trade similar securities as Dalton for its own client accounts. We, however, manage this conflict by conducting all such trades of similar securities (publicly traded equities) through Dalton traders and under the review of the Dalton compliance program.

Mr. Rosenwald serves as the Chief Investment Officer and a Director of Rising Sun, an investment adviser for Nippon Active Value Fund PLC ("NAVF"), incorporated in England and Wales and listed on the London Stock Exchange, and for other privately offered pooled investment vehicle(s).

Additionally, Mr. Combs serves as a Director of Rising Sun. Rising Sun entered into a research services agreement with Dalton Advisory KK, the Tokyo-based research affiliate of Dalton.

Historically, the accounts and funds under the discretionary management of Dalton primarily invested in owner-operator businesses, whereas NAVF and NAVF Select LLC, which is under the discretionary management of Dalton, has been pursuing an "activist" strategy in Japan, investing in businesses run by professional directors. Recently, however, certain Dalton accounts have been investing (and are fully expected to invest in the future) in some of the securities held by NAVF, and vice versa (or directly into those funds). Several potential conflicts of interest exist with these "overlapping" opportunities. For example, there is no assurance that a Dalton account will receive an allocation of all of those investments that it wishes to pursue, for regulatory (*e.g.*, if Rising Sun becomes aware of material, non-public information about a Japanese company) or other reasons. Also, when the Dalton accounts purchase the securities already held by NAVF, given the overlapping investments may have been held by NAVF for a significant period of time, it is possible that the purchase price by the Dalton accounts might be, in certain cases substantially, higher than the price paid by NAVF. Because the Dalton accounts and NAVF generally are expected to sell the overlapping investment opportunities simultaneously through one, aggregated trade, the Dalton accounts' realization of capital gains (if any) may be lower, potentially dramatically, than that of NAVF.

Further, Messrs. Rosenwald and Combs, along with the research analysts of Dalton Advisory KK, commit significant time and resources to Rising Sun and NAVF (and any similar vehicles that may be formed in the future), in addition to their responsibilities owed to the Dalton accounts. Lastly, when a Dalton account invests in NAVF, the Dalton account will pay fees and expenses to NAVF. Under those circumstances, Dalton will waive its fees to the extent necessary so that no double-charging will occur at the Dalton level on one hand and at the NAVF level on the other hand. Please contact Dalton for further inquiries or requests for information.

We may hold capital interests in the management companies of other investment firms or in such firms' private investment limited partnerships and may serve as directors for such management companies. Neither we nor our affiliates, however, have the power to direct the management or policies of such management companies.

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

A. Code of Ethics

Our Code of Ethics (the "Code") is designed to monitor and prevent potential conflicts of interest. It generally requires:

- Dalton and its "supervised persons" consider the interests of our clients before their own;
- compliance with federal securities laws;
- reporting and review of personal securities transactions and holdings;
- reporting of violations of the Code; and
- distribution of the Code to all personnel, as it may be amended, with a requirement that all supervised persons provide a written acknowledgement that they have received the Code.

Our supervised persons include employees and other persons subject to our supervision and control. For purposes of compliance with the Code, we treat all "supervised persons" as "access persons."

Our policy includes, among others, except with the approval of Dalton's CCO, restrictions on trading certain instruments, including reportable securities, for access persons' personal accounts without first obtaining pre-clearance, serving on the boards of directors of any outside companies, or receiving or offering gifts or entertainment worth a designated monetary value from or to persons doing business with Dalton or its affiliates.

A copy of the Code will be furnished upon request.

B. Securities in which Dalton or a Related Person has a Material Financial Interest

Cross Trades

From time to time, we may determine that it would be in the best interest of certain clients to transfer a security from one client to another for a variety of reasons, including without limitation, tax purposes, and liquidity purposes, to rebalance the portfolios of the clients or to reduce transaction costs that may arise in open market transactions.

If we determine that a cross trade is in the best interests of each client involved, we will take steps to ensure that the transaction is consistent with our fiduciary duty to each client, is permitted pursuant to the guidelines for each of these clients and is compliant with the regulations under the Employee Retirement Income Security Act of 1974, as applicable.

Principal Transactions

To the extent that a cross trade may be viewed as principal transaction due to the ownership interest in a client by Dalton or its personnel (or related persons and entities), we will comply with the requirements of Section 206(3) of the Investment Advisers Act of 1940, and Dalton must receive written client approval prior to settlement of the trade.

C. Investing in Securities that Dalton or a Related Person Recommends to Clients

We have implemented policies relating to personal account trading by employees and related persons designed to reduce, monitor, and resolve conflicts of interest. Our access persons are subject to our personal trading pre-clearance policy, which includes no trading of reportable securities without the approval of the CCO and is designed to generally prevent access persons from transacting in securities of issuers at or about the same time that we recommend securities to Client accounts. Our policy also prohibits transactions in securities that are restricted from trading.

D. Conflicts of Interest Created by Contemporaneous Trading

Please also see discussion under Item 12.B below, as well as Item 11.A above.

We have designed policies and procedures that seek to monitor and resolve conflicts fairly and equitably.

We may give advice or take action with respect to the investments of one or more client accounts that may not be given or taken with respect to other client accounts with similar investment programs, objectives, and strategies. Accordingly, although certain client accounts may have similar strategies, they may not hold the same securities or instruments and may not achieve the same performance

Item 12: Brokerage Practices

A. Factors Considered in Selecting or Recommending Broker-Dealers for Client Transactions

As an investment adviser, we have full discretion and authority to make all investment decisions with respect to the types, amounts and prices of securities or instruments to be bought or sold, the brokers or dealers to be used for a particular transaction, and commissions or markups and markdowns paid.

Our primary consideration in executing a securities transaction is to seek to obtain best execution. Best execution generally takes the following into consideration: total costs or proceeds in each transaction ; the reliability, integrity, and financial condition of the broker-dealer; the size of and difficulty in executing the order; and full range and quality of a broker-dealer's services including, among other things, the value of research provided, execution capability, commission rate, financial responsibility, and responsiveness to us. Therefore, the price to a particular client in any particular transaction may be less favorable than that available from another broker-dealer if the difference is reasonably justified by other aspects of the execution services offered.

1. Research and Other Soft Dollar Benefits

Certain brokers who effect securities transactions for our client accounts provide us with research and other brokerage services, which benefits Dalton because such services supplement our own research. Research and brokerage services received through the placement of securities transactions of clients generally are available for the benefit of all our client accounts, and the research and brokerage services may be utilized in connection with managing accounts that have not placed securities transactions.

We intend to use commission or "soft" dollars to pay for proprietary and/or third-party research or brokerage products or services that fall within the safe harbor for soft dollars created by Section 28(e) of the Securities Exchange Act of 1934. Research products and services, which are generally written or on-line, include, but are not limited to, investment reports, liquidity analyses, pricing and financial information, investment periodicals, financial reports, company reports, regulatory filings, news services, industry reports, economic reports, company recommendations, interview services, analyst reports and comments, political and regional analyses.

Research and brokerage services generally include access to various computer-generated data, computer software, and meetings arranged with corporate and industry spokespersons and economists. Reports, services, and products may or may not contain specific recommendations

about a company, sector, region, or time horizon, but shall contain information to assist in the investment decision-making process. Dalton has an incentive to select or recommend a broker-dealer based on Dalton's interest in receiving the research or other products or services, rather than on the clients' interest in receiving most favorable execution. Generally where a product or service obtained with commission dollars provides both 28(e)-eligible and 28(e)-ineligible products or service assistance, we will attempt to make a reasonable allocation of the cost which may be paid for with soft dollars, and we will pay the remainder. In making good-faith allocations of costs between 28(e)-eligible and 28(e)-ineligible expenses, a conflict of interest may exist on the allocation of the costs of such benefits and services that primarily benefit us and those that primarily benefit our client accounts.

Generally, arrangements for the provision of research and other brokerage services are subject to the following conditions: (i) the approval process involves Dalton's CCO, CFO and/or Dalton's Risk Management Committee; (ii) the arrangement is documented; (iii) the services provided by the broker-dealer are for the benefit of our client accounts; and (iv) no such arrangement commits any of our client accounts to pay a specified rate of commission to, to generate a specified amount of commission with, or to make any payments to, any particular broker-dealer.

Research and other services paid for with soft dollars will not necessarily benefit all clients equally. Some clients whose commissions are not used to generate soft dollar credits may benefit. In certain cases, the research services are available only from the broker-dealer providing such services. In other cases, the research services may be available from alternate sources in exchange for cash payments.

We may cause a particular client to pay a broker or dealer that provides brokerage and research services to us in an amount of commission for executing a securities transaction in excess of the amount of commission that another broker or dealer would have charged for effecting the same transaction. We will have determined, however, that the particular amount of commission in this event will be reasonable in relation to the value of brokerage and/or research services provided by the executing broker-dealer. In making this determination, the benefits of research or brokerage services are evaluated to define the product or service provided in making investment decisions on behalf of our clients. The receipt of eligible research and brokerage products and services provided through a soft dollar arrangement could potentially create a conflict of interest because Dalton would otherwise have to pay for such products and services with hard dollars. We review soft dollar services quarterly in connection with our Risk Management Committee meetings.

In addition to the above, Dalton partners with Tora Trading to supplement Dalton's internal trading resources and execution capabilities. To the extent applicable, Tora's commissions are paid by Dalton's clients in addition to other brokerage execution costs and are reviewed in Dalton's best execution review process. Lastly, Dalton employs a third-party vendor for soft dollar aggregation services. The cost associated with soft dollar aggregation generally is included in the brokerage commissions.

2. Brokerage for Client Referrals

We from time to time participate in certain "capital introduction" programs organized or sponsored by certain prime or executing brokers to our client accounts. Through such events, prospective

investors would have the opportunity to meet with our representatives. We do not compensate prime or executing brokers or their affiliates for organizing such programs or making such introductions or for any investments ultimately made by such prospective investors, nor do we anticipate doing so in the future.

While such programs and introductions may provide an incentive or influence us in deciding whether to use such prime or executing broker, we will not commit to allocate a particular amount of brokerage to a prime or executing broker in any such situation.

3. Directed Brokerage

We do not routinely recommend, request, or require that a client direct us to execute certain transactions through a specified broker-dealer.

A client occasionally may direct us to effect securities transactions in the client's account through a specific broker-dealer. This instruction shall be construed as a "directed brokerage arrangement." In such circumstances, the client is responsible for negotiating the terms and arrangements for their account with that broker-dealer. We will not seek better execution services or prices from other broker-dealers or be able to aggregate the client's transactions (unless via a "step-out" trade), for execution through other broker-dealers, with orders for other accounts advised or managed by us. As a result, we may not obtain best execution on behalf of the client, who may pay materially disparate commissions, greater spreads, or other transaction costs, or receive less favorable net prices on transactions for the account than would otherwise be the case.

We will document the client's direction of brokerage.

B. Order Aggregation

We may, but are not obligated to, aggregate purchase or sale orders and allocate the securities or other assets so purchased or sold, on an average price basis, among participating client accounts. Dalton will generally aggregate purchase and sale orders of investments held by client accounts in the same strategy with similar orders being made simultaneously for other accounts or entities if, in Dalton's reasonable judgment, such aggregation is reasonably likely to result in an overall economic benefit to clients based on an evaluation that they will be benefited by relatively better purchase or sale prices, lower commission expenses or beneficial timing of transactions, or a combination of these and other factors.

To the extent that certain purchase or sale transactions are recommended for clients in different strategies or by different portfolio managers, Dalton typically will not aggregate such orders, and, in fact, such portfolio managers could cause different clients to take investment positions that are different from or adverse to those taken for another client, including positions contrary to those or senior or junior to those held by such client.

It is the general policy of Dalton and its affiliates to allocate investment opportunities to client accounts fairly, to the extent practical and in accordance with client accounts' applicable investment strategies, over a period of time. An account is generally traded independently when the account's guidelines/restrictions differ from other accounts. As such, Dalton may or may not

aggregate trades or determine pre-trade allocation for separately managed accounts with differing guidelines or mandates.

Accounts trading *pari passu* with other like accounts generally are allocated investment opportunities on a *pro rata* basis. Allocations for aggregated trades are generally determined prior to the trade. In determining trade allocation, however, we may consider other factors as we deem appropriate, including, but not limited to, investment objectives, investment limitations, cash availability, liquidity, the timing of capital inflows and outflows and anticipated capital commitments, subscriptions, distributions and/or withdrawals, portfolio diversification, relative market, industry or country exposure, tax efficiency and potential adverse tax consequences, regulatory, policy and/or other restrictions applicable to clients, the risk profile of an investment opportunity, and any other factors deemed relevant by us. The outcome of any allocation determination by us therefore may result in the allocation of all or none of an investment opportunity to a particular client or account. There can be no assurance that a client or an account will have an opportunity to participate in certain investments that fall within the client's or account's investment objectives or guidelines. We may amend our trade allocation policies at any time at its sole discretion.

Item 13: Review of Accounts

A. Frequency and Nature of Review of Client Accounts or Financial Plans

We perform various daily, weekly, monthly, quarterly, and periodic reviews of each client's portfolio. In addition to reviews by the portfolio managers listed below, Dalton's operations team and compliance team are also involved in reviewing client portfolios.

Mr. Rosenwald reviews all accounts within the Asia strategy and the Emerging Markets.

Mr. Combs reviews all accounts within the Global strategy.

B. Factors Prompting Review of Client Accounts other than a Periodic Review

A review of a client account may be triggered by unusual activity or special circumstances on a case-by-case basis.

C. Content and Frequency of Account Reports to Clients

We provide the following written reports to our fund investors:

(1) annual audited financial statements are sent to investors within 120 days after the end of the fiscal year; and

(2) monthly performance and account report

Reporting with respect to separately managed accounts is subject to negotiation and follows each client's investment management agreement. Such reports are typically written.

Item 14: Client Referrals and Other Compensation

A. Economic Benefits for Providing Services to Clients

We do not receive economic benefits from non-clients for providing investment advice and other advisory services.

B. Compensation to Non-Supervised Persons for Client Referrals

Dalton from time to time engages a third-party marketer, a registered broker-dealer, to assist in marketing its private funds. Dalton also acts as sub-adviser to certain pooled investment vehicles, and those fund platforms generally have third-party distribution arrangements.

Item 15: Custody

All client assets are held in custody by unaffiliated broker-dealers or banks; however, we are deemed to have constructive custody of the assets of certain private funds that we manage due to Dalton or a related person serving as general partner for such funds. Additionally, Dalton may be deemed to have custody due to direct debiting of fees from separate account clients.

Investors in our funds receive monthly account balance statements from the independent administrator. Additionally, the funds are audited on an annual basis, and investors receive a copy of the audited financials within 120 days of the funds' fiscal year-end.

Separate account clients should receive quarterly or monthly statements from the qualified custodian that they have selected. Clients should carefully review those statements and should compare them to any statements received from Dalton.

Dalton generally credits any class action settlements received or proceeds from the sales of illiquid securities for a fund to current investors in that particular fund. If a fund has already been liquidated before recovery amounts are received, Dalton will take reasonable efforts to identify and deliver funds to eligible investors. In the event investors cannot be identified or located, Dalton generally may distribute the proceeds to a charitable organization.

Item 16: Investment Discretion

Unless otherwise specified and except for one account as of the date of this document, we have discretionary trading authority for each client account granted through an investment management agreement, limited partnership, or similar operating documents. Investment decisions and advice are subject to the investment objectives and guidelines included in the client's advisory agreement.

We or our affiliates have entered into an investment management agreement, limited partnership agreement or similar agreement with each fund, or beneficial owner of each managed account, evidencing our granted discretionary trading authority.

Item 17: Voting Client Securities

Generally, we seek to vote proxies on behalf of our clients to maximize shareholder value. To that end, we seek to consider both the short- and long-term implications of a proposal. We may abstain from voting proxies in the event that we determine that abstention would be in the best interest of the client(s). We monitor for potential conflicts of interest between the client's interest and our own within the proxy voting process. Clients generally cannot direct Dalton's proxy votes. Certain clients control their own voting and do not give Dalton a proxy.

Dalton's Risk Management Committee is responsible for monitoring material conflicts of interest that we, our affiliates or our affiliated persons may face. If a material conflict is identified, our proxy procedures include: (1) voting with the recommendation of an outside proxy voting service, (2) a unanimous vote by three disinterested management committee members or (3) engagement of an outside consultant.

Our proxy voting policy and procedures are available for further review. Any client may request a proxy voting report at any time. Our contact information is on the first page of this brochure.

Item 18: Financial Information

We have never filed for bankruptcy and are not aware of any financial condition expected to affect our ability to manage client accounts.

We formed RCM as a New York corporation in 1984 and Rising Sun as an exempted limited company in the Cayman Islands in 2019. Mr. James B. Rosenwald III is the President of RCM. The Rosenwald Family Trust owns 100% of RCM. RCM owns the majority of Rising Sun.

B. Advisory Services

RCM provides discretionary investment advisory services to a select group of domestic and foreign institutional clients including insurance companies and charitable organizations. The investment parameters of each such separately managed account will vary by strategy, client specific guidelines and applicable regulations.

In addition, RCM also provides discretionary investment advisory services to commingled funds. The investors for the funds include domestic and foreign institutional investors, high net-worth family offices and individuals, and directly or indirectly include Mr. Rosenwald, members of his extended family and trusts or other entities established for any of the foregoing persons' benefit.

As of the date of this document, Rising Sun serves as an investment adviser to the Nippon Active Value Fund plc ("NAVF") listed on the London Stock Exchange and one privately offered, pooled investment vehicle, which is managed by Dalton Investments, Inc. ("Dalton") Rising Sun also may serve as an investment adviser for other pooled investment vehicle(s) in the future.

Commingled funds are offered only by private placement and are limited to accredited and qualified investors as defined by the SEC.

We have included in our ADV Part 1A the list of our private funds managed on a discretionary basis. In addition to the fund disclosures, Part 1A includes information about our affiliated entities that are the general partners to funds we manage. Part 1A is available on the SEC's website or by contacting us.

C. Customized Services

Our advisory services will vary by client, but we typically have broad and flexible investment parameters and are generally permitted to make investments outside of the core strategies when the opportunity arises, and the investment fits our investment philosophy.

For example, certain client accounts and funds may utilize margin borrowing and other forms of leverage. Our client mandates may permit us to invest in long and short positions as well as certain illiquid securities and jurisdictions. Investment parameters and limitations are described in each client's respective advisory contract.

Similarly, the holdings for the private funds will vary by and within a strategy. This is attributable to differing investment strategies, various investment restrictions and tailoring for certain investor limitations or requests.

We will emphasize or deemphasize, add, develop or eliminate different investments and strategies from time to time depending upon, among other factors, our view of new market opportunities or regulatory changes.

To the extent that our clients are commingled funds, we provide advisory services to the commingled funds and not to the individual investors in such funds.

In addition, although we have not done so in the past, we reserve the right to enter into separate agreements with certain investors in our commingled funds which may provide more favorable terms than those provided to our other investors, including more favorable fee terms.

D. Wrap Fee Programs

None.

E. Client Assets

As of December 31, 2025, RCM's net assets under management were $245,645,727 regulatory assets (based on unaudited numbers and excluding the account for which RCM advises exclusively on real estate assets). RCM does not manage any non-discretionary accounts.

Item 5: Fees and Compensation

A. Advisory Fees and Compensation

Management Fees

Our compensation generally includes a management fee typically paid in arrears either monthly, quarterly, or annually. Fees for strategy-specific separately managed accounts are subject to negotiation. Factors such as the client's proposed investment size and/or a long-term commitment may be taken into consideration in negotiating the fee.

Management fees payable by the commingled funds may vary and are described in each fund's offering materials, or organizational documents. Our standard management fees charged to the funds are calculated as a percentage of assets under management and typically range from 0.1 up to 1.0% per annum but may be higher or lower per client written agreements. Management fees are generally payable and deducted from the assets of each Fund quarterly in arrears.

Performance Fees and Allocations

For certain client accounts and commingled funds, we may receive performance-based compensation. For our funds, our performance-based allocation is typically charged at a year-end generally, at a rate of up to 20% of all net realized and unrealized profits (if any) from each investor's account as of year-end, subject to a high-water mark. Certain funds may have a performance-based compensation based on relative performance over a specific benchmark, greater than one-year performance measurement periods and differing performance compensation rates.

We are generally not entitled to receive any performance-based compensation to the extent that there are unrecouped accumulated losses in performance carried forward from prior years.

We have in the past and may in the future decide to rebate, reduce, or waive either the management fee or performance-based compensation for certain classes or investors. To the extent that we are sharing portions of either the management fee or performance compensation with others, it is solely at our cost.

Redemption Amount

We seek to partner with investors who share our long-term view and investment philosophy.

Thus, some of our funds and other collective vehicles may be subject to a fee for withdrawals made during a lock-up period. In those cases, we may charge an early withdrawal fee ranging from 1-2% and deduct directly from the early withdrawal amounts.

Some of our separately managed accounts may also have an early withdrawal provision that provides for a change in fees for early withdrawals.

B. Payment of Fees

We generally charge management fees either monthly or quarterly in arrears based upon assets under management for the respective measuring period. The management fee is typically pro-rated for contributions or withdrawals made within, depending on the fund, either intra-month or quarter.

Separate account clients must authorize the payment of management fees on a transaction-by-transaction basis. In certain cases, separate account clients will authorize such approved fees to be debited directly from their account. Fees paid from commingled funds are debited directly from the funds.

To the extent applicable, performance-based compensation is calculated after the accrual of any applicable management fees.

C. Additional Fees and Expenses

Any additional fees and expenses for our separately managed account clients will vary and are subject to negotiation.

Fund investors will pay certain expenses directly and will reimburse us for certain expenses paid on a fund's behalf as described in their offering materials.

From time to time, certain expenses, such as legal costs, may be allocated across the accounts managed by RCM. In those cases, RCM generally allocates the expenses on a fair and equitable manner (*e.g.*, *pro rata* based on each account's assets under management).

Generally, funds are responsible for operating expenses which include, but are not limited to the following:

- brokerage and execution charges, commissions, custodial charges, and fees for quotation and other data services;
- accounting, trading, portfolio management and risk management systems expenses;
- research subscriptions and expenses;
- travel, legal and consulting fees related to investment research or board meetings and due diligence;
- broken trade and broken deal fees;
- expenses to register securities and transfer taxes;
- costs and expenses incurred for the purpose of protecting or enhancing a fund's value of the assets (including the costs of instituting and defending litigation);
- U.S. federal, state and local taxes, filing and registration fees, including audits associated with such taxes and filings (other than our corporate taxes);
- investor communications, relations, bookkeeping, accounting and the preparation and mailing of financial, tax and performance information to investors fees, costs and expenses;
- fees, costs and expenses incurred in connection with borrowings;
- administration fees, costs and expenses;
- premiums and other costs of D&O/E&O and other insurance;

- fees for attorneys, accountants, consultants and other professionals or experts related to a fund's investment; and

- Directors' fees and expenses.

If one of our funds holds other unaffiliated collective managed investments, *e.g.*, mutual funds, those underlying fund fees including a management fee, other fund expenses and a possible distribution fee are paid by the fund directly and are not deducted or rebated from our fees. We, however, may waive the underlying fund fees of those pooled investment vehicles managed by our affiliated entities, such as Dalton. Please note that you can generally purchase mutual funds directly without our advisory services.

D. Prepayment of Fees

Not Applicable.

E. Additional Compensation and Conflicts of Interest

While we utilize third parties to administer the commingled funds, we typically assist in reviewing the net asset value of the commingled funds and retains responsibility to determine the net asset value of its separately managed account clients. This practice creates a potential conflict of interest because if the determination of the net asset value is inaccurate, we might receive management fees and performance compensation that are greater or (less) than the actual compensation entitled. In addition, for the commingled funds, inaccurate valuations could potentially cause redeeming investors and new investors to receive less (or more) fund redemption proceeds or interests than otherwise entitled. Further, in particular, for one of the private vehicles managed by us, unlisted securities in real estate holding companies and in other limited partnerships or limited liability companies are valued at the most recent Schedule K-1 capital account if such capital account is positive, and if such capital account is negative, then 10% of cost (as opposed to the fair market value).

We have instituted valuation policies and procedures, which include reconciliation procedures for identifying and resolving material differences with third party administrators. Additionally, to the extent a client has financial auditors, they provide an additional check of valuation.

Additionally, from time to time, investment team members serve as directors or special observers on the boards of directors of companies in which we invest, and in such cases the employee may (although they generally do not) receive director fees and/or expenses.

Item 6: Performance-Based Fees and Side-by-Side Management

We manage client accounts with differing fees – including management fee only and lower or relative performance-based compensation accounts.

Consequently, the incentive to favor higher performance-based compensation accounts over accounts with differing fees exists as a potential conflict of interest.

In addition, performance-based compensation may create an incentive for our portfolio managers to select investments that are riskier or more speculative than might otherwise be the case for fixed managed fee accounts.

We seek to mitigate this potential conflict through our allocation policies and procedures. Please see Item 10 below for a more detailed discussion of conflicts of interest.

Item 7: Types of Clients

Our clients include:

Institutional separate account clients – *e.g.*, insurance companies and charitable entities.

Commingled funds, including private funds and an exchange-traded fund listed on the London Stock Exchange.

Investors in the funds include, among others, fund of funds, pension funds, endowments, foundations, other financial institutions and corporations, family offices and high net worth individuals, and directly or indirectly include Mr. Rosenwald, members of his extended family and trusts or other entities established for any of the foregoing persons' benefit. We generally require that each US investor in its private commingled funds be an "accredited investor" as defined in Regulation D under the Securities Act of 1933 and in the case of 3(c)(7) funds, a "qualified purchaser" as defined under the Investment Company Act of 1940. Investors in the funds are generally required to invest a minimum of $1,000,000. RCM has waived, and reserves the right to modify or waive this minimum requirement.

Required investment amounts for separately managed accounts are negotiated and may differ substantially.

The private funds may enter into separate agreements, commonly referred to as "side letters", or other similar agreements with a particular limited partner in connection with its admission to the private fund without the approval of any other limited partner, which would have the effect of establishing rights under or supplementing the terms of the applicable private fund's partnership agreement with respect to such limited partner in a manner more favorable to such limited partner than those applicable to other limited partners. Such rights or terms in any such side letter or other similar agreement may include, without limitation: (i) reporting obligations, (ii) waiver of certain confidentiality obligations, (iii) "most favored nation" provisions or (iv) rights or terms requested or necessary in light of particular investment, legal, regulatory or public policy characteristics of a limited partner.

Item 8: Methods of Analysis, Investment Strategies and Risk of Loss

We are a disciplined, value-oriented, global investment management firm committed to capital preservation and long-term growth. Since our formation, our strategies have primarily focused on investments in global securities (including debt, preferred and common equity, convertibles,

and liquidation units), real estate, pooled investment funds, venture capital investments, and other private offerings.

We seek less crowded areas of markets and believe our value is largely attributable to our agility and rigorous value analysis. Our investment objective is to generate positive long-term compounded returns on an absolute and relative basis.

Across our strategies and client accounts, we seek broad and flexible mandates. We generally concentrate the number of investment holdings. We search for investments that we believe are mispriced or misunderstood in the market and have the potential for appreciation over a longer holding period.

We invest and trade in (i) securities and other instruments, including, but not limited to, stocks, bonds, notes, high-yield securities, options, warrants, rights, private claims, bank debt, sovereign debt, credit default swaps, derivatives, commodities, futures, options on futures, pooled investment vehicles, and other securities and instruments of U.S and non U.S. issuers, and (ii) real estate assets. Certain accounts engage in short selling, margin trading and other investment and hedging strategies.

A. Methods of Analysis and Investment Strategies

Securities

James B. Rosenwald III is RCM's Founder and President and is Rising Sun's Chief Investment Officer. Mr. Rosenwald has more than 40 years of investing experience.

We search for undervalued, owner-operated profitable businesses. Our shorts include specific positions with the opposite characteristics of our long positions and serve as a hedge for the portfolio or a specific security within the portfolio.

All investment ideas are researched and implemented by Mr. Rosenwald. Our research includes our own determination of fair value through our rigorous analysis of company financials, and includes, where possible, meetings with key company managers, suppliers, and/or clients to assess company strategy and alignment of interests.

While our investments are primarily in equity securities and other pooled investment vehicles, certain accounts permit derivatives, options, debt and other complicated investments.

We may offer other advisory services, and, to the extent consistent with our agreements with our clients, engage in any investment strategy and make any investment, at any time.

Real Estate

We continually analyze relevant market, property and company fundamentals in various sectors and locations. Our investment approach is driven by a disciplined investment strategy focused on identifying areas with below market risk relative to the potential for above market returns.

- Attractive pricing. Considerable discount to replacement cost; existence of distressed (or disinterested) seller or distressed assets.

- Sources of distinctive competitive advantage. Previous exposure to, or knowledge of, markets or asset types; other market inefficiencies and informational arbitrage.

- Appropriate risk and return relationship. Understanding of capital structures, uniqueness of markets, and attendant risks within those markets and investment types; ability to minimize risks and maximize returns across global markets.

- Attractive capital structure. Appropriate use of prudent leverage levels and flexibility of structure to achieve opportunistic exits as and when available; creation of return enhancement at appropriate risk levels.

- Exceptional quality of partner / management. Previous experiences with management; unique industry expertise; aligned interests and commitment to integrity of relationship.

- Significant degree of complexity. Can provide edge against lower cost of capital competitors; extract hidden or obscured value; utilize significant structuring and underwriting expertise for intricate transactions.

- Appropriate degree of control. Ability to determine or influence the direction of management, strategy, financing, and exit of the asset.

- Acceptable legal environment. Suitable legal jurisdiction to ensure negotiated transaction documents provide adequate protection and will be upheld in accordance with their legal and commercial terms.

- Income generation. Properties with actual or potential cash flow characteristics allowing enhanced risk-adjusted returns.

- Opportunity to add value. Focus on assets with inherent characteristics that allow value enhancement through expansion, repositioning, or application of property, finance, and asset management expertise as well as our entrepreneurial skills.

- Clarity of exit. Ability to appropriately define reasonable exit(s) at the time of acquisition, identify multiple options and avoid reliance on public markets as only exit alternative.

- Follow-on investment opportunity. Depth and breadth of opportunity pool in specific industry and/or region.

PAST PERFORMANCE IS NOT A GUARANTEE OF FUTURE PERFORMANCE. THE VALUE OF THE INVESTMENTS AND THE INCOME FROM THEM CAN GO DOWN AS WELL AS UP AND AN INVESTOR MAY NOT GET BACK THE AMOUNT INVESTED. THESE INVESTMENTS ARE DESIGNED FOR INVESTORS WHO UNDERSTAND AND ARE WILLING TO ACCEPT THESE RISKS. PERFORMANCE MAY BE VOLATILE, AND AN INVESTOR COULD LOSE ALL OR A SUBSTANTIAL PORTION OF ITS INVESTMENT.

B. Certain Risks Relating to Investment Strategies

In considering an investment with us, we urge you to view our strategies as speculative and entailing substantial risks. There is no assurance that we will meet our investment objectives or a certain return threshold. While capital preservation is a primary focus of our investment process, you should consider the impact to you of a substantial or total loss of your investment.

We have included below certain risk factors that we believe are material, significant or unusual for our strategies based on current information. This non-exhaustive list is not a complete explanation of the risks that should be considered prior to investing with us. We do not address certain standard material risk factors that may cover for example certain instrument types or structural risks. Some or all of these risks may be applicable to a strategy mandate or fund. Please thoroughly review all materials with your advisers in consideration of your specific circumstances or risk tolerance.

Investment in Securities

Foreign Investment Considerations

Special risks associated with securities of foreign companies add to the complexity and usual risks inherent in domestic investments. Such special risks include fluctuations in foreign exchange, political or economic instability in the country of issue, and the possible imposition of exchange controls or other laws or restrictions.

In addition, securities prices in foreign markets are generally subject to different economic, financial, political and social factors than are the prices of securities in U.S. markets. With respect to some foreign countries there is a possibility of expropriation or confiscatory taxation, limitations on liquidity of securities or political or economic developments.

Moreover, less information may be publicly available concerning certain of the foreign issuers of securities than is available concerning U.S. companies. Foreign companies are also generally not subject to uniform accounting, auditing and financial reporting standards or to practices and requirements comparable to those applicable to U.S. companies. Trading foreign investments may be particularly difficult depending on the foreign jurisdiction.

Emerging Markets

Emerging market investments are subject to all of the risks of foreign investments generally, as well as additional heightened risks due to a lack of established legal, political, business and social frameworks to support securities markets.

These risks include, without limitation:

- liquidity risks (sometimes aggravated by rapid and large outflows of "hot money" and capital flight),
- extreme currency and political risks, including potential exchange control regulations and restriction on foreign ownership,
- repatriation of capital,
- social instability and unrest, terrorism, corruption and crime,
- delays in settling portfolio transactions, risk of loss arising out of systems of security registration and custody, less effective government regulation and supervision of business and industry and a greater likelihood of disruptions brought about by regional conflicts, and
- high levels of inflation, deflation or currency devaluation, each of which can harm their economies and securities markets.

Given our investment strategy, portfolio holdings may be highly volatile and may decline significantly in response to adverse issuer, political, social, regulatory, market or economic developments.

Foreign Currency Transactions and Exchange Rate Risk

Investments may be denominated in non-U.S. currencies and in other financial instruments, the price of which is determined with reference to such currencies. To the extent unhedged, the value of an account's net assets is subject to fluctuations in exchange rates as well as with price changes of the account's investments in the various local markets and currencies.

Forward currency contracts and options may be utilized to hedge against currency fluctuations, but there can be no assurance that such hedging transactions will be available or, even if undertaken, effective.

Highly Volatile Markets

Price movements of forward contracts and other derivative contracts are influenced by, among other things, interest rates, changing supply and demand relationships, trade, fiscal, monetary and exchange control programs and policies of governments, and national and international political and economic events and policies.

In addition, governments from time to time intervene, directly and by regulation, in certain markets, particularly those in currencies, financial instruments and interest rate-related options. Such intervention often is intended directly to influence prices and may, together with other factors, cause all of such markets to move rapidly in the same direction because of, among other things, interest rate fluctuations.

Concentration of Investments

Client accounts may hold a relatively small number of securities positions, each representing a relatively large portion of the account's capital and may hold a large percentage of capital in cash while awaiting better opportunities. Losses incurred in these positions could have a material adverse on an account's overall financial condition, including opportunity loss.

Small Capitalization Companies

The securities of small capitalization and recently organized companies pose greater investment risks. The equity securities of small capitalization companies may be more illiquid, i.e. less trading volume.

Investments in small capitalization companies may also be more difficult to value than other types of securities. Investments in companies with limited operating histories are more speculative and entail greater risk than do investments in companies with an established operating record. Additionally, transaction costs for these types of investments are often higher than those of larger capitalization companies.

Short Sales

For certain client accounts, we may make short sales in any type of securities. Short sales theoretically involve unlimited loss potential, as the market price of securities sold short may continuously increase.

General Derivatives Considerations

The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in securities or more traditional investments, depending upon the characteristics of the particular derivative and the account's portfolio as a whole.

Derivatives may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in derivatives could have a large potential impact on the account's performance. Derivatives transactions include counterparty risk in addition to the risks associated with the underlying investment.

Investments in Real Estate

Our investments in commercial and residential real estate are subject to risks typically associated with real estate. The value of real estate may be adversely affected by a number of risks, including, without limitation:

- local, state, national or international economic conditions;
- real estate conditions, such as an oversupply of or a reduction in demand for real estate space in an area;
- tenant/operator mix and the success of the tenant/operator business;
- property management decisions;
- property location and conditions;
- property operating costs, including insurance premiums, real estate taxes and maintenance costs;
- the perceptions of the quality, convenience, attractiveness and safety of the properties;
- branding, marketing and operational strategies;
- competition from comparable properties;
- the occupancy rate of, and the rental rates charged at, the properties;
- the ability to timely collect all rent;
- the effects of any bankruptcies or insolvencies;
- the expense of leasing, renovation or construction;
- changes in interest rates and in the availability, cost and terms of mortgage financing;
- unknown liens being placed on the properties;
- actions of third parties;
- the ability to refinance mortgage notes payable related to the real estate on favorable terms, if at all;
- changes in governmental rules, regulations and fiscal policies;
- tax implications;
- changes in laws, including laws that increase operating expenses or limit rents that may be charged;

- the impact of present or future environmental legislation and compliance with environmental laws, including costs of remediation and liabilities associated with environmental conditions affecting properties;

- cost of compliance with the Americans with Disabilities Act of 1990;

- adverse changes in governmental rules and fiscal policies;

- social unrest and civil disturbances;

- acts of nature, including earthquakes, hurricanes and other natural disasters;

- terrorism;

- the potential for uninsured or underinsured property losses;

- adverse changes in state and local laws, including zoning laws; and

- other factors which are beyond control.

The value of each property is affected significantly by its ability to generate cash flow and net income, which in turn depends on the amount of rental or other income that can be generated net of expenses required to be incurred with respect to the property. Many expenses associated with properties (such as operating expenses and capital expenses) cannot be reduced when there is a reduction in income from the properties. These factors may have a material adverse effect on the value and return that our clients can realize.

Further, our investments include privately offered real estate syndicates with their own lock-up period, which may impact whether, when and at what price the fund(s) managed by us may redeem from such syndicates, further compounding the potential illiquidity of the investment made in the fund(s).

Casualty Losses; Uninsurable Losses

Real estate investments are expected to maintain comprehensive casualty insurance on its investments, including liability and fire and extended coverage. However, there are certain types of losses, generally of a catastrophic nature, such as earthquakes, floods and hurricanes that may be uninsurable or not economically insurable. We may or may not obtain, or be able to obtain, or require borrowers to obtain, terrorism insurance. Inflation, changes in building codes and ordinances, environmental considerations, and other factors also might make it infeasible to use insurance proceeds to replace a property if it is damaged or destroyed. Under such circumstances, the insurance proceeds, if any, might not be adequate to restore the economic value of the property, which might impair our client's security and decrease the value of the property.

Financial Condition of Tenants or Operators

Real estate investments made by RCM clients may be adversely affected by financial difficulties experienced by any of their major tenants/operators, including bankruptcy, insolvency or a general downturn in the business, or in the event that any of the major tenants/operators do not renew or extend their relationship as their lease terms expire. RCM clients are exposed to the risk that the tenants/operators of properties in which they invest may not be able to meet their obligations to RCM affiliates or other third parties, which may result in their bankruptcy or insolvency. Although the leases and loans permit landlords to evict a tenant/operator, demand immediate repayment and pursue other remedies, bankruptcy laws afford certain rights to a party that has filed for bankruptcy or reorganization. A tenant/operator in bankruptcy may be able to restrict the landlord's ability to collect unpaid rents or interest on behalf of the RCM clients during the bankruptcy proceeding. Furthermore, dealing with a tenant/operator's bankruptcy or other default may divert RCM attention and cause the RCM client to incur substantial legal and other costs.

Undeveloped Land / Development Property Risk

Clients may invest in underdeveloped land and certain development properties. Undeveloped land and development properties may involve more risk than properties on which development has been completed. Undeveloped land and development properties do not generate operating revenue while costs are incurred to develop the properties, and may also generate certain expenses including property taxes and insurance. Development activities include the risks that development projects may be abandoned after expending resources, construction costs of a project may exceed original estimates, occupancy and rental rates at a newly completed property may be less than anticipated and construction and leasing of a property may not be completed on schedule. Development activities are also subject to risks relating to the inability to obtain, or delays in obtaining, all necessary zoning, land-use, building, occupancy, and other required governmental permits and authorizations. Contingencies in development activities beyond the control of the Clients could occur.

C. Recommendations of Particular Types of Securities

Not Applicable.

Item 9: Disciplinary Information

To the best of our knowledge and as certified annually by each employee, none of our employees have been involved in any legal or disciplinary events in the past 10 years that would be material to a client's evaluation of us.

Item 10: Other Financial Industry Activities and Affiliations

A. Broker-Dealer Registration Status

Not Applicable.

B. Futures Commission Merchant, Commodity Pool Operator or Commodity Trading Adviser Registration Status

We claim exemption from registration with Commodity Futures Trading Commission and the National Futures Association.

C. Material Relationships or Arrangements with Industry Participants

We provide discretionary investment management services to, and our affiliates serve as the general partner to various commingled funds.

Dalton and Rising Sun Rising Sun are both under common control with RCM. Additionally, Rising Sun is a relying adviser of RCM.

RCM and Rising Sun each has a shared services agreement whereby Dalton provides RCM and Rising Sun with back-office services, including compliance and trading, for a fee.

D. Certain Conflicts of Interest among our Clients

We have adopted policies and procedures, including Code of Ethics and other policies to address certain potential conflicts of interests.

Our affiliated persons and employees may from time to time act as directors, secretary, manager, investment manager or investment adviser or carry out other functions as may be required from time to time in relation to, or be otherwise involved in or with, other funds and clients which have similar investment objectives.

In addition, we do not generally prohibit engagements in existing or future business if such activity does not materially interfere with our business or conflict with our obligations.

Different accounts charge differing fees and incentive fees and/or allocations due to circumstances such as different contractual rates or loss recovery account balances.

Our accounts may have conflicting interests with respect to their investments, including with respect to selling objectives, taxes, performance, liquidity, timing and other objectives. For example, certain accounts may from time to time be selling securities and instruments that other accounts may continue to hold and/or purchase.

Performance results may vary substantially among our client accounts.

E. Material Conflicts of Interest Relating to Other Investment Advisers

We, along with our affiliates, have relationships with certain advisers and operating companies that could present potential or actual conflicts of interest.

For example, we or our affiliates hold capital interests in the management companies of other investment firms or in such firms' private investment limited partnerships and may serve as directors for such management companies.

In particular, RCM is a majority-owner of Dalton; Mr. Rosenwald is a Founding Partner and the Chief Investment Officer of Dalton. He also serves as a director of certain of the offshore feeder funds of Dalton's hedge funds. The investment strategies and guidelines of RCM, Rising Sun and Dalton may overlap in a material manner, and potential conflicts of interests regarding allocations by Mr. Rosenwald of investment opportunities between clients of RCM, Rising Sun and clients of Dalton could arise as a result of different compensation arrangements or for other reasons. To the extent such conflicts arise, and an investment opportunity identified by Mr. Rosenwald is suitable for both clients of RCM/Rising Sun and clients of Dalton, such opportunities will be allocated in a manner consistent with our allocation policies and procedures and Dalton's allocation policies and procedures, which may still result in certain clients being treated more favorably than others.

Mr. Rosenwald serves as the Chief Investment Officer and a Director of Rising Sun, an investment adviser for NAVF, incorporated in England and Wales and listed on the London Stock Exchange, and NAVF Select LLC (previously, "Michael 1925 LLC"), which is a limited liability company formed in the State of Delaware. Rising Sun also may serve as an investment adviser for other pooled investment vehicles. RCM is a majority-owner of Rising Sun. Rising Sun entered into a research services agreement with Dalton Advisory KK, a Tokyo-based, wholly owned research subsidiary of Dalton.

Investment opportunities that are appropriate for an RCM account also may be appropriate for NAVF and other pooled investment vehicles for which Rising Sun may serve as an investment adviser, and there is no assurance that an RCM account will receive an allocation of all of those investments that it wishes to pursue, for regulatory (*e.g.*, if Rising Sun becomes aware of material, non-public information about a Japanese company) or other reasons. Further, Mr. Rosenwald commits time and resources to Rising Sun, Dalton and NAVF, in addition to his responsibilities owed to the RCM accounts.

When an RCM account invests in NAVF and/or other pooled investment vehicle(s) advised by Rising Sun, Rising Sun will be charging fees to the account. Under those circumstances, RCM will waive its fees to the extent necessary so that no double-charging will occur at the RCM level on one hand and at the Rising Sun level on the other hand.

In addition, RCM utilizes the assets of pooled vehicle clients of RCM to make investments in Dalton pooled vehicles or pooled vehicles of other management companies (including Beach Front Property Management, Inc., which manages real estate exclusively and not securities) in which Mr. Rosenwald, direct or indirect beneficial owners of RCM or their family members or affiliates have ownership or other interests, and this may result in Dalton or such other management companies (and, indirectly Mr. Rosenwald, direct or indirect beneficial owners of RCM or their respective family members or affiliates) collecting management fees, performance fees and other compensation from RCM clients. The payment of such compensation to Dalton or

such other management companies may be in addition to the management fees, performance fees and other compensation otherwise payable to RCM by the RCM clients.

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

A. Code of Ethics

Our Code of Ethics is designed to monitor and prevent potential conflicts of interest. It generally requires:

- RCM, Rising Sun and their "supervised persons" consider the interests of our clients before their own;
- compliance with federal securities laws;
- reporting and review of personal securities transactions and holdings;
- reporting of violations of the Code;
- distribution of the Code to all personnel, as it may be amended, with a requirement that all supervised persons provide a written acknowledgement that they have received the Code;
- our supervised persons consist of managing members and managing directors, employees and other persons subject to our supervision and control; and
- for purposes of compliance with the Code, we generally treat all "supervised persons" as "access persons."

Our Code includes, among others, restrictions on trading certain instruments, including reportable securities for supervised persons' personal accounts without first obtaining pre-clearance, serving on the boards of directors of any outside companies except with the approval of RCM's or Rising Sun's Chief Compliance Officer or his/her designee (the "CCO"), or receiving or offering gifts or entertainment worth a substantial monetary value from or to persons doing business with RCM or Rising Sun.

A copy of our Code will be furnished upon request.

B. Securities in which RCM or a Related Person has a Material Financial Interest

Cross Trades

From time to time, we may determine that it would be in the best interest of certain clients to transfer a security from one client to another for a variety of reasons, including without limitation, tax purposes, and liquidity purposes, to rebalance the portfolios of the clients or to reduce transaction costs that may arise in open market transactions.

If we determine that a cross trade is in the best interests of each client involved, we will take steps to ensure that the transaction is consistent with our fiduciary duty to each client, is permitted pursuant to the guidelines for each of these clients and is compliant with the regulations under the Employee Retirement Income Security Act of 1974, as applicable.

Principal Transactions

To the extent that a cross trade may be viewed as principal transaction due to the ownership interest in a client by us or its personnel, we will comply with the requirements of Section 206(3) of the Advisers Act, and we must receive written client approval prior to settlement of the trade.

C. Investing in Securities that RCM or a Related Person Recommends to Clients

We have implemented policies relating to personal account trading by employees and related persons designed to reduce, monitor and resolve conflicts of interest. Our access persons are subject to our personal trading pre-clearance policy, which includes no trading of reportable securities without the approval of the CCO and is designed to generally (1) prevent access persons from transacting in securities of issuers at or about the same time that we recommend securities to Client accounts and (2) also prevent transactions in securities that are restricted from trading. Trading by the CCO will require approval of a CCO designee.

D. Conflicts of Interest Created by Contemporaneous Trading

Please also see discussion under Item 12.B below, as well as Item 11.A above.

We have designed policies and procedures that seek to monitor and resolve conflicts fairly and equitably.

We may give advice or take action with respect to the investments of one or more client accounts that may not be given or taken with respect to other client accounts with similar investment programs, objectives and strategies.

Accordingly, although certain client accounts may have similar strategies, they may not hold the same securities or instruments and may not achieve the same performance. Returns for any given client account may also adversely affect the prices and availability of other securities or instruments.

Item 12: Brokerage Practices

A. Factors Considered in Selecting or Recommending Broker-Dealers for Client Transactions

As an investment adviser, RCM has full discretion and authority to make all investment decisions with respect to the types, amounts and prices of securities or instruments to be bought or sold, the brokers or dealers to be used for a particular transaction, and commissions or markups and markdowns paid. Our primary consideration in executing a securities transaction is to seek to obtain best execution. Best execution generally takes the following into consideration:

total costs or proceeds in each transaction ; the reliability, integrity and financial condition of the broker-dealer; the size of and difficulty in executing the order; and full range and quality of a broker-dealer's services including, among other things, the value of research provided, execution capability, commission rate, financial responsibility, and responsiveness to us. Therefore, the price to a particular client in any particular transaction may be less favorable than that available from another broker-dealer if the difference is reasonably justified by other aspects of the execution services offered.

1. Research and Other Soft Dollar Benefits

We generally do not have any soft dollar arrangements, but if we do in the future, we will only use soft dollars to obtain products and services that fall within the safe harbor provided by Section 28(e) of the Securities Exchange Act of 1934 and will disclose its soft dollar practices in Part 2 of Form ADV.

2. Brokerage for Client Referrals

We do not consider whether it or a related person receives client referrals from a broker-dealer or a third party when selecting or recommending broker-dealers.

3. Directed Brokerage

We do not routinely recommend, request, or require that a client direct us to execute certain transactions through a specified broker-dealer.

On occasions, a client may direct us to effect securities transactions in the client's account through a specific broker-dealer. This instruction shall be construed as a "directed brokerage arrangement". In such circumstances, the client is responsible for negotiating the terms and arrangements for their account with that broker-dealer. We will not seek better execution services or prices from other broker/dealers or be able to aggregate the client's transactions (unless via a "step-out" trade), for execution through other broker-dealer, with orders for other accounts advised or managed by us. As a result, we may not obtain best execution on behalf of the client, who may pay materially disparate commissions, greater spreads or other transaction costs, or receive less favorable net prices on transactions for the account than would otherwise be the case.

We will document the client's direction of brokerage.

B. Order Aggregation

We may but are not obligated to, aggregate purchase or sale orders and allocate the securities or other assets so purchased or sold, on an average price basis, among participating client accounts. We, when appropriate and possible and unless otherwise noted, will generally attempt to aggregate purchase and sale orders of investments held by client accounts in the same strategy with similar orders being made simultaneously for other accounts or entities if, in our reasonable judgment, such aggregation is reasonably likely to result in an overall economic benefit to clients

based on an evaluation that they will be benefited by relatively better purchase or sale prices, lower commission expenses or beneficial timing of transactions, or a combination of these and other factors.

To the extent that certain purchase or sale transactions are recommended for clients in different strategies or by different portfolio managers, we typically will not aggregate such orders and, in fact, such portfolio managers could cause different clients to take investment positions that are different from or adverse to those taken for another client, including positions contrary to those or senior or junior to those held by such client.

Item 13: Review of Accounts

A. Frequency and Nature of Review of Client Accounts or Financial Plans

We perform various daily, weekly, monthly, quarterly and periodic reviews of each client's portfolio. In addition to reviews by Mr. Rosenwald, RCM's, Rising Sun's or Dalton's operations team and compliance team are also involved in reviewing client portfolios.

B. Factors Prompting Review of Client Accounts other than a Periodic Review.

A review of a client account may be triggered by unusual activity or special circumstances on a case-by-case basis.

C. Content and Frequency of Account Reports to Clients

We or the fund administrators provide the following written reports to our fund investors to the extent required:

(1) annual audited financial statements are sent to investors within 120 days after the end of the fiscal year; and

(2) monthly or quarterly performance and account report.

Reporting with respect to separately managed accounts is subject to negotiation and follows each client's investment management agreement. Such reports are typically written.

Item 14: Client Referrals and Other Compensation

A. Economic Benefits for Providing Services to Clients

We do not receive economic benefits from non-clients for providing investment advice and other advisory services.

B. Compensation to Non-Supervised Persons for Client Referrals

N/A.

Item 15: Custody

All client assets, which are securities or cash will be held in custody by unaffiliated qualified custodians, unless, in the case of certain securities, we determine to rely on the audit exception to the custody rule. However, we may be deemed to have constructive custody of the assets of certain private funds that we manage due to us or a related person serving as general partner for such funds or certain securities being in uncertificated form. Additionally, we may be deemed to have custody due to direct debiting of fees from separate account clients.

To the extent required under applicable law, investors in our funds (or their independent representatives) will receive monthly or quarterly account balance statements from the qualified custodian, us or the independent administrator. Additionally, the funds are audited on an annual basis and investors receive a copy of the audited financials within 120 days of the funds' fiscal year-end.

Separate account clients should receive quarterly or monthly statements from the qualified custodian or administrator that they have selected. Clients should carefully review those statements and should compare them to any statements received from us.

Item 16: Investment Discretion

Unless otherwise specified (*e.g.*, Rising Sun's advisory arrangements), we have discretionary trading authority for each client account granted through an investment management agreement, limited partnership or similar operating documents. Investment decisions and advice are subject to the investment objectives and guidelines included in client's advisory agreement.

We or our affiliates have entered into an investment management agreement, limited partnership agreement or similar agreement with each fund, or beneficial owner of each managed account, evidencing our granted discretionary trading authority.

Item 17: Voting Client Securities

Generally, we seek to vote proxies on behalf of our clients to maximize shareholder value. To that end, we seek to consider both the short- and long-term implications of a proposal. We monitor for potential conflicts of interest between the client's interest and our own within the proxy voting process. Clients generally cannot direct our proxy votes.

If a material conflict is identified, our proxy procedures include (1) voting with the recommendation of an outside proxy voting service, (2) a unanimous vote by 3 disinterested management committee members or (3) engagement of an outside consultant.

Our proxy voting policy and procedures are available for further review. Any client may request a proxy voting report at any time. For further information, please let us know. Our contact information is on the first page of this brochure.

Item 18: Financial Information

We have never filed for bankruptcy and are not aware of any financial condition expected to affect our ability to manage client accounts.

Independent Auditors' Report

To the Plans Administration Committee of Citigroup Inc.
The Citigroup Pension Plan:

Opinion

We have audited the financial statements of The Citigroup Pension Plan (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits as of December 31, 2024 and 2023, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2024 and 2023, and the changes in its net assets available for benefits for the years then ended, in accordance with U.S. generally accepted accounting principles.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with U.S. generally accepted accounting principles, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in

KPMG LLP, a Delaware limited liability partnership and a member firm of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee.

the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Supplemental Schedules Required by ERISA

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules of Schedule H, line 4i - Schedule of Assets (Held at End of Year) as of December 31, 2024, Schedule H, line 4i - Schedule of Assets (Acquired and Disposed of Within Year) for the year ended December 31, 2024, Schedule H, line 4j - Schedule of Reportable Transactions for the year ended December 31, 2024, and Schedule G, Part I - Schedule of Fixed Income Obligations in Default or Classified as Uncollectible as of December 31, 2024 are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion, the information in the accompanying schedules is fairly stated, in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

(1) Plan Description

The following brief description of The Citigroup Pension Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan document for a complete description of the Plan's provisions.

(a) General

The Plan is a defined benefit pension plan sponsored by Citigroup Inc. and participating affiliates (collectively, the Plan Sponsor or the Company). The Plan was designed to provide benefits to all eligible employees of the Company upon reaching retirement age or after termination. Effective January 1, 2008, the Plan was frozen for most employees. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA).

The Company offers postretirement healthcare benefits to certain eligible U.S. retired employees, their spouses and dependents. In accordance with Section 401(h) of the Internal Revenue Code (IRC), a separate account was established (Retiree Medical Account (RMA) – note 11), consisting of Company contributions made with the intention of providing future healthcare benefits to eligible retired employees under the Citigroup Retiree Medical Benefit Plan (the Retiree Medical Plan). The assets of the RMA are commingled with the Plan assets and are held in a trust (the Trust) for investment purposes and are included in investments, at fair value on the statements of net assets available for benefits.

Bank of New York Mellon is the trustee of the assets of the Trust established in connection with the Plan. The Plan engages registered investment advisors (investment managers) to invest the Plan's assets on its behalf.

(b) Benefits

Plan benefits are determined based on age, completed years of service and eligible compensation of participants. Participants are 100% vested in their benefits after three years of vesting service, upon reaching age 55 with one year of service, upon terminating employment by reason of disability, or if the participant dies while actively employed by the Company.

The Plan consists of a cash balance formula, granting compensation-based benefit credits and interest credits to participants, as well as grandfathered pension formulas and ongoing traditional annuity benefit accruals to certain long-service employees of legacy pension plans. The Plan was closed to new participants effective January 1, 2008. In addition, no additional compensation-based contributions were credited to the cash balance portion of the Plan for existing Plan participants after that date although interest credits will continue to accrue. Employees covered under grandfathered pension formulas generally continued to accrue benefits under their respective grandfathered formula.

(c) Expenses

Administrative and investment management expenses of the Plan are generally paid by the Plan to the extent allowed in accordance with the Plan document. The Plan Sponsor may elect to pay for certain expenses.

Certain expenses related to brokerage commissions, trading fees, investment management fees, incentive allocations and other expenses resulting from purchases and sales of investments within the Plan's investment funds are reflected in the net asset value (NAV) or its equivalent of those various Plan investment funds.

(2) Summary of Significant Accounting Policies

(a) Basis of Accounting

The accompanying financial statements have been prepared under the accrual basis of accounting.

(b) Use of Estimates

The preparation of the financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires the Plan's management to make estimates and assumptions that affect the reported amounts of assets and liabilities, changes therein, and disclosure of contingent assets and liabilities and the actuarial present value of accumulated plan benefits, and changes therein, at the date the financial statements are prepared. Actual results could differ from those estimates and assumptions. Significant estimates inherent in the preparation of the financial statements include the fair value of investments.

(c) Investments Valuation and Income Recognition

The Plan's investments are stated at fair value.

The Plan's investments include separately managed accounts held in the Trust, as well as an immediate participation guarantee contract with MetLife Insurance Company of Connecticut and group annuity contracts maintained by John Hancock Life Insurance Company, which were issued in 2022.

The Plan's investments in separately managed accounts are reported in the financial statements at the underlying security level. The fair value of such investments is based on the year-end fair values of those securities.

Cash equivalents and short-term investments, including money market funds, are valued at cost, which approximates fair value.

The fair values of mutual funds and other registered investment companies and equities traded on national securities exchanges are determined by closing prices on the last business day of the period; securities traded in the over-the-counter (OTC) market and listed securities for which no sale was reported on the valuation date are valued at the average of the last reported bid and ask prices; debt securities for which published quotations are not available are valued based on yields currently available on comparable securities of other issuers with similar credit ratings; and long-term debt securities are valued using the latest available bid prices as quoted by dealers making a market in the securities. Exchange-traded derivatives are valued using market observable prices.

Insurance contracts are valued based on the contract value which approximates fair value.

Commingled funds are valued based on NAV, which is based on the fair value of the underlying securities that have readily determinable fair values.

OTC derivatives, which include swaps, options and forwards, are valued by using pricing models that incorporate market inputs that are relevant and appropriate for pricing the securities. The models use yield curves to perform standard arbitrage-free discounted cash flow and expected cash flow calculations of prices based on the durations of the securities.

The other investments category includes primarily derivatives and a timber investment. The timber investment is stated at estimated fair value which reflects the underlying fair value of its assets, including timber assets appraised by independent third-party appraisal firms, and liabilities.

Limited partnerships, hedge funds and private equities for which published quotations are not available are valued at estimated fair value as determined by the general partner or investment manager of that investment. These investments are reported at NAV or its equivalent as a practical expedient for fair value in accordance with the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, *Fair Value Measurement*. The Plan's trustee generally receives monthly valuations for hedge funds and quarterly valuations for private equity funds. The Plan's management reviews monthly and quarterly investment valuations as part of the ongoing monitoring of the Plan's investments.

Purchases and sales of investments are recorded on a trade-date basis. Where investments in a security have been bought at different prices, average cost is used to determine gains and losses on sales of the investments. Securities purchased or sold near year-end may result in payments on these securities not being made or received until after the Plan's year-end. The amounts of such payments are recorded as payables or receivables as of year-end in the statements of net assets available for benefits. Interest income is recorded as earned on the accrual basis. Dividend income is recorded on the ex-dividend date.

(d) Translation of Investments Denominated in Foreign Currencies

The cost and fair values of investments denominated in foreign currencies are translated into U.S. dollars at each statement of net assets date using the current London interbank spot mid-market quotation. Foreign currency gains or losses are included in net appreciation in fair value of investments. Foreign exchange gains and losses on forward contracts are recognized based on mid-market rates adjusted for the forward premium and are included in net appreciation in fair value of investments.

(e) Payment of Benefits

Benefit payments are recorded when paid.

The Plan purchased several group annuity contracts from various insurance carriers in order to fund certain benefit payments. Certain contracts are allocated to individual participants and were recognized as a deduction from net assets when purchased. The Plan pays participants their Plan benefit directly and receives a reimbursement from the insurance carriers for the portion that is the responsibility of the respective insurance carrier. The benefit payments to participants and reimbursements related to these contracts are not reflected in the statements of changes in net assets available for benefits. Certain

other contracts are not fully allocated and remain assets of the Plan. The benefit payments and reimbursements received under these unallocated contracts are reflected as benefits paid to participants and investment income, respectively, in the statements of changes in net assets available for benefits.

(3) Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered.

Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died and (c) active employees or their beneficiaries.

The actuarial present value of accumulated plan benefits is determined by independent actuaries and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements, such as death, disability, withdrawal, or retirement) between the valuation date and the expected dates of payments.

The actuarial present value of accumulated plan benefits as of December 31, 2024 and 2023 is presented as follows:

	2024	2023
Vested participants:		
Participants currently receiving benefits	$ 5,225,126,859	$ 5,486,047,737
Other participants	3,279,949,316	3,612,196,023
Total vested benefits	8,505,076,175	9,098,243,760
Nonvested benefits	13,172,262	17,156,420
Total present value of accumulated plan benefits	$ 8,518,248,437	$ 9,115,400,180

The changes in the actuarial present value of accumulated plan benefits for the years ended December 31, 2024 and 2023 are summarized below:

	2024	2023
Actuarial present value of accumulated plan benefits at beginning of year	$ 9,115,400,180	$ 9,211,357,782
Increase (decrease) during the year attributable to:		
Additional benefits accumulated	1,702	25,398
Actuarial loss	58,168,090	5,924,876
Interest due to decrease in discount period	443,971,348	484,138,835
Benefits paid to participants	(830,486,246)	(828,759,477)
Actuarial assumption changes	(268,806,637)	242,712,766
Net (decrease)	(597,151,743)	(95,957,602)
Actuarial present value of accumulated plan benefits at end of year	$ 8,518,248,437	$ 9,115,400,180

The actuarial assumption changes from 2023 to 2024 primarily relate to an increase in the discount rate from 5.10% to 5.55%, an increase in the interest crediting rate from 4.10% to 4.55% and an increase in the lump-sum conversion rate from 5.10% to 5.55%. The actuarial assumption changes from 2022 to 2023 primarily relate to a decrease in the discount rate from 5.50% to 5.10%, a decrease in interest crediting rate from 4.50% to 4.10% and a decrease in the lump-sum conversion rate from 5.50% to 5.10%.

On December 19, 2022, the Plan entered into a single premium non-participating group annuity contract with Prudential Insurance Company of America ("Prudential") for $19 million. In May 2024, Prudential reimbursed the Plan in the amount of $593,253 representing a premium true-up from the 2022 group annuity contract conversion.

The significant actuarial assumptions used for the computation of the actuarial present value of accumulated plan benefits are:

	2024	2023
Discount rate	5.55%	5.10%
Mortality	PRI-2012/MP-2021	PRI-2012/MP-2021
Employee turnover	Based on actual experience	Based on actual experience
Retirement age	Age range from 55 to 70	Age range from 55 to 70

At December 31, 2024 and 2023, the Company continued to utilize the PRI-2012 mortality table (white collar) with a 7% reduction in standard rates to reflect historical plan participant mortality experience and Mortality Projection 2021 (MP-2021) projection table. The MP-2021 projection scale is projected from 2012.

The actuarial assumptions are based on the presumption that the Plan will continue. Should the Plan terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

(4) Contributions

The Plan is subject to the minimum funding requirements of ERISA, which are actuarially determined and have been met for 2024 and 2023. There were no required cash contributions during 2024 and 2023.

(5) Investments

The Plan's investment strategies are to invest in a prudent manner for the exclusive purpose of providing benefits to participants. The investment strategies are targeted to produce a total return that, when combined with Company contributions, if any, will maintain the Plan's ability to meet all required benefit obligations.

Risk is controlled through diversification of asset types and investments in domestic and international equities, fixed-income securities, other investments and cash. The assets of the Plan are diversified to limit the impact of any individual investment. Assets are diversified across multiple asset classes, with cash and cash equivalents, publicly traded debt securities and limited partnerships and other investments representing the most significant asset allocations. Investments in these asset classes are further diversified across funds, managers, strategies, vintages, sectors and geographies, depending on the specific characteristics of each asset class.

Commingled funds	$ 621,573,620	$ —	Daily-monthly
Hedge funds:			
Long/Short	354,851,294	—	Monthly-quarterly

Private equities	1,441,722,336	558,352,000	No redemptions

Commingled funds are pooled investment vehicles offered to institutional investors. A commingled fund combines investment capital from multiple investors and is overseen by professional investment advisers who make the investment decisions on how to best deploy the capital according to the terms and conditions of the fund.

Long/short hedge funds are managed portfolios of investments that involve taking long positions in investments that are expected to increase in value and short positions in investments that are expected to decrease in value.

Event driven hedge funds are managed portfolios of investments where the manager takes a position in a certain number of companies with special situations. This can include, but is not limited to, mergers and distressed situations.

Global macro hedge funds are managed portfolios of investments where the manager positions the portfolio on macroeconomic principles.

Multi strategy hedge funds employ multiple strategies to diversify risks and reduce volatility.

Fixed income hedge fund's objective is to generate attractive risk-adjusted returns in excess of the Bloomberg U.S. Treasury 7-10 Year Index by trading primarily in U.S. Treasuries and short-term corporate debt securities, which may include non-investment grade securities.

Private equity investments are equity capital that are not quoted on a public exchange. Investments are made directly into private companies or buyouts of public companies. There is a required holding period rendering these investments illiquid. Distributions for investments in the category are received through the liquidation of the underlying investments of the fund and therefore are not redeemable.

(b) Derivatives

Derivatives are financial instruments whose cash flows are based on a notional amount or an underlying instrument, where there is little or no initial investment and whose terms require or permit net settlement. Derivative instruments include swaps, options, forwards and futures.

Derivative instruments are acquired and held to add incremental value and to reduce investment risk. Although the contract or notional amount of these instruments is not recorded on the financial statements, these instruments are recognized as either an investment asset or a liability, depending on the rights or obligations of the contract measured at fair value. As of December 31, 2024 and 2023, the Plan held derivative assets of $35,717,969 and $80,974,383, respectively, which are included in the investments at fair value as reported in the statements of net assets available for benefits and are included in other investments, levels 1 and 2 on the fair value hierarchy table. Derivative liabilities are included in the other investment liabilities amount in the statements of net assets available for benefits. As of December 31, 2024 and 2023, the Plan held ($39,889,165) and ($46,895,253), respectively, of derivative liabilities.

Derivative instruments may involve, to varying degrees, elements of credit and market risk in excess of amounts recognized in the financial statements. The Plan minimizes the credit (or repayment) risk in these instruments by entering into transactions with high-quality counterparties. The Plan manages market risk by establishing and monitoring limits as to the type and degree of risk that may be undertaken.

There were no derivative contracts accounted for as hedging instruments under FASB ASC 815, *Derivatives and Hedging*, during 2024 and 2023.

The tables below represent the fair value of derivative instruments by risk in the statements of net assets available for benefits at December 31, 2024 and 2023.

(i) Forward Foreign Currency Contracts

In order to mitigate foreign currency exchange rate risks or for investment purposes, the investment managers of the Plan may buy or sell forward foreign currency contracts. Investments in forward foreign currency contracts obligate one party to purchase and the other party to sell a specific currency at a set price on a future date. Forward foreign currency contracts are valued monthly based on forward market rates, with the resulting adjustment being recorded as unrealized gain (loss), which is included on the statements of changes in net assets available for benefits as net appreciation (depreciation) in the fair value of investments.

(Continued)

Certain risks result from investing in foreign securities that have additional risks compared to the usual risks inherent in domestic investments. Such risks include future political, economic and currency exchange developments including investment restrictions and changes in foreign laws. The investment manager and by extension, the Plan is also subject to the credit risk that the other party will not complete the obligation of the contract.

(ii) Futures Contracts

In order to gain exposure to, or protect against, declines in security values, inclusive of foreign currency, equity, commodity and interest rate driven changes, the investment managers of the Plan may buy and sell futures contracts. Futures contracts generally are sold to mitigate declines in the value of portfolio securities. The Plan may also purchase futures contracts to gain exposure to market changes as it may be more efficient or cost-effective than actually buying securities. Variation margin payments are equal to the daily changes in contract value and are recorded as realized gains and losses, which are included on the statements of changes in net assets available for benefits as part of net appreciation (depreciation) in the fair value of investments.

Risks of entering into futures contracts include the possibility that there may be an illiquid market and that changes in the value of the contract may not correlate with changes in the value of the underlying securities.

(iii) Options

In order to mitigate certain risks, such as interest rate risk, or to speculate on changes in the expected direction of underlying prices, investment managers of the Plan may buy or sell options. An option is a derivative instrument that specifies a contract between two parties for a future transaction on an asset at a reference price. The buyer of the option gains the right, but not the obligation, to engage in the transaction, while the seller incurs the corresponding obligation to fulfill the transaction.

Certain risks result from investing in options. Risks of entering into options contracts include the possibility that there may be an illiquid market and that the changes in the value of the contract may not correlate with changes in the value of the underlying securities.

(iv) Swaps

In order to mitigate certain risks, such as interest rate risk and credit risk, or to speculate on changes in the expected direction of underlying prices, the investment managers of the Plan may use swaps. A swap is a financial contract between two parties, where each party pays the other party periodic payments over the life of the contract according to some pre-specified rules based on a certain underlying index. In most swaps, one party makes the fixed payments while the other party delivers the floating payments according to the underlying index. Gains and losses on swaps are included in net appreciation (depreciation) in the Plan's statements of changes in net assets.

Certain risks result from investing in swaps. There is price risk which arises due to the movement of the underlying index so that the values of future payments change. This risk can be minimized by taking offsetting positions. There is also default risk which is exposure to the risk of failure of the counterparty.

(6) Fair Value Measurements

FASB ASC 820 provides a framework for measuring fair value, which provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

- Level 1 – Quoted prices for identical instruments in active markets.
- Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.
- Level 3 – Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable.

This hierarchy requires the Plan's management to use observable market data, when available, and to minimize the use of unobservable inputs when determining fair value. As required by ASC 820, assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

The methods described above may produce a fair value measurement that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

FASB ASC 820 investments for which fair value is measured using the NAV per share practical expedient are excluded from the fair value hierarchy.

The tables on the following pages categorize the Plan's investments by level within the fair value hierarchy as of December 31, 2024 and 2023.

(7) Risks and Uncertainties

The investment managers of the Plan invest in various investment securities. Investment securities, in general, are exposed to various risks such as interest rate, credit and overall market volatility risk. Due to the level of risk associated with certain investment securities, it is reasonable to expect that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

The Plan may indirectly invest in securities with contractual cash flows, such as asset-backed securities. The value, liquidity and related income of these securities are sensitive to changes in economic conditions and may be adversely affected by shifts in the market's perception of the issuers and changes in interest rates.

In the normal course of business, the Plan enters into transactions in various financial instruments with off-balance-sheet risk. These financial instruments involve varying degrees and types of risks, including credit and market risks, which may be in excess of the amounts recognized in the statements of net assets available for benefits of the Plan.

Credit risk represents the potential loss to the Plan due to possible nonperformance by obligors and counterparties of the terms in their contracts. Market risk represents the potential loss to the Plan due to the decrease or increase in the value of an on- or off-balance-sheet financial instrument caused primarily by changes in interest rates or foreign exchange rates or a combination thereof.

The Plan employs the use of derivatives to mitigate interest rate exposure relative to its liabilities in order to reduce funding level volatility.

Forward contracts and futures represent commitments to purchase or sell securities, money market instruments or foreign currencies at a future date and at a specified price. Both credit and market risks exist with respect to forward contracts. Market risk exists with respect to futures. These positions are carried at current fair value and the unrealized gain or loss is included in limited partnerships and other investments and other investment liabilities. Financial futures are marked to market and settled with the broker on a daily basis. The Plan does not anticipate that losses, if any, as a result of credit or market risk would materially affect the net assets available for benefits of the Plan. The Plan, to a limited extent, enters into transactions involving other financial instruments and commitments as an integral part of the overall management of the investment portfolio.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported, based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

(8) Plan Termination

Although the Company has not expressed any intent to do so, it has the right to terminate the Plan in accordance with the Plan provisions and the provisions set forth under ERISA. In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed under ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under plan provisions in effect at any time during the five years preceding plan termination.

2. Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations (discussed below).

3. All other vested benefits (that is, vested benefits not insured by the PBGC).

4. All nonvested benefits.

Additionally, the PBGC insures certain benefits under the Plan if the Plan so terminates. Generally, the PBGC guarantees most vested normal retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Whether all participants will receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets available for benefits to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan Sponsor and level of benefits guaranteed by the PBGC. There is a statutory ceiling on the amount of an individual's monthly benefit that the PBGC guarantees, which is adjusted periodically and adjusted for timing and form of payment. For plan terminations occurring during 2025, the ceiling is $7,432 per month for a straight life annuity in the year a participant attains age 65.

(9) Tax Status

The Plan was amended and restated effective January 1, 2020. By notice dated February 5, 2021, the Plan obtained a favorable determination letter from the Internal Revenue Service (IRS), in which the IRS determined that the terms of the Plan, as amended and restated effective January 1, 2020, were in compliance with the applicable requirements of the IRC.

Further, by notices dated September 18, 2025, the Plan obtained favorable determinations from the Puerto Rico Department of Treasury (PR Treasury), that the terms of the Plan, as amended and restated effective January 1, 2020, and Amendments 1 and 3 thereto were in compliance with applicable requirements under the Puerto Rico Internal Revenue Code of 1994, as amended (PRIRC).

Although the Plan has been amended since receiving the February 5, 2021 determination letter from the IRS, the Plan's management and the Plan's legal counsel believe that the Plan, as amended and restated, continues to be qualified as exempt and continues to operate in compliance with the applicable requirements of the IRC. The Plan administrator and its counsel are aware of no aspect of the Plan's design or operation that would result in the Plan's disqualification under the applicable provisions of the IRC and the PRIRC. Therefore, no provision for income taxes has been included in the Plan's financial statements.

GAAP requires the Plan's management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS and the PR Treasury. The Plan's management and counsel have analyzed the tax positions taken by the Plan and have concluded that as of December 31, 2024, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements.

The Plan is subject to audits by taxing jurisdictions. An examination of the Plan by the U.S. Department of Labor, Employee Benefits Security Administration, although not a taxing jurisdiction, is in progress. The Plan Sponsor believes the Plan is no longer subject to tax examination for years prior to 2021.

(10) Party-in-Interest Transactions

The Plan incurs costs for services provided by the Plan's trustee, administrator, investment managers and others. Under ERISA, these entities are considered related parties-in-interest and are allowable under ERISA regulations. The Plan's payments for these services are exempt from the prohibited transaction provisions of ERISA.

(11) Retiree Medical Account

As explained in note 1, the RMA was established to pay healthcare benefits and related administrative expenses incurred by eligible retirees and their beneficiaries. These retirees share in the cost of their healthcare benefits through co-payments, service-related contributions and salary-related deductibles. In accordance with Section 401(h) of the IRC, the net assets of the RMA may not be used for, or diverted to, any purpose other than providing health benefits for eligible retirees and their beneficiaries. Plan participants do not contribute to the RMA.

Effective January 1, 2011, the net assets of the RMA were allocated between the Health Plan and the Retiree Medical Plan in accordance with the creation of the Retiree Medical Plan. Net assets of the RMA are allocated between the Health Plan and the Retiree Medical Plan based on claims paid. The related obligations for health benefits are not included in this Plan's accumulated benefit obligations but are reflected as obligations of the Health Plan and the Retiree Medical Plan.

The Retiree Medical Plan was amended effective January 1, 2021 to move grandfathered Medicare-eligible retirees to the Medicare individual marketplace. As a result, the net assets of the RMA were fully allocated to the Retiree Medical Plan.

Net assets of the RMA were $148,607,226 and $174,781,956 as of December 31, 2024 and 2023, respectively. The RMA accounted for 1.510% and 1.693% of the Plan's net assets per the Form 5500 as of December 31, 2024 and 2023, respectively.

Employer contributions to the RMA are determined annually and are at the discretion of the Company. The Company made $0 contributions to the RMA for the years ended December 31, 2024 and 2023.
